OMB Control No.: 2127-0004

# Part 573 Safety Recall Report

## 19V-003

Manufacturer Name: Daimler Vans USA, LLC

NHTSA Recall No.: 19V-003

Manufacturer Recall No.: NR

#### **Manufacturer Information:**

Manufacturer Name: Daimler Vans USA, LLC

Address: One Mercedes-Benz Drive

Sandy Springs GA 30328

Company phone: 854-888-3214

## **Population:**

Number of potentially involved: 71,301 Estimated percentage with defect: 1 %

#### **Vehicle Information:**

Vehicle 1: 2015-2017 Mercedes-Benz Sprinter Vehicle Type: BUSES, MEDIUM & HEAVY VEHICLES

Body Style : VAN
Power Train : DIESEL

Descriptive Information: Approximately 5,171 Freightliner Sprinter vehicles are potentially affected in the U.S.

Approximately 66,130 Mercedes-Benz

Sprinter vehicles are potentially affected in the U.S.

MY 2015 Freightliner SprinterMY 2015 Mercedes-Benz Sprinter

MY 2016 Freightliner Sprinter

MY 2016 Mercedes-Benz SprinterMY 2017 Freightliner Sprinter

• MY 2017 Mercedes-Benz Sprinter

Production Dates: JUN 04, 2014 - JUL 05, 2017

VIN Range 1 : Begin : NR End : NR Not sequential

Vehicle 2: 2015-2017 Freightliner Sprinter Vehicle Type: BUSES, MEDIUM & HEAVY VEHICLES

Body Style : VAN
Power Train : DIESEL

Descriptive Information: Approximately 5,171 Freightliner Sprinter vehicles are potentially affected in the U.S.

Approximately 66,130 Mercedes-Benz

Sprinter vehicles are potentially affected in the U.S.

MY 2015 Freightliner Sprinter

• MY 2015 Mercedes-Benz Sprinter

• MY 2016 Freightliner Sprinter

MY 2016 Mercedes-Benz Sprinter

• MY 2017 Freightliner Sprinter

•	MY 2017 Mercedes	s-Benz Sprinter		
Production Dates: JUN 04, 2014 - JUL 05, 2017				
VIN Range 1 : Begin :	NR	End: NR	☐ Not sequential	

### **Description of Defect:**

Description of the Defect: Certain Sprinter vehicles are equipped with driver side front airbags provided by the supplier TK Holdings Inc. ("Takata") and its successor Joyson Safety Systems ("JSS"). On January 2, 2019, JSS filed another Defect Information Report with NHTSA announcing a defect in the subject inflators. According to JSS/Takata, the propellant wafers in some of the subject inflators may degrade over time, which could lead to over-aggressive combustion in the event of an airbag activation. Overly aggressive combustion creates excessive internal pressure when the inflator is activated, which may cause the inflator body to

> Daimler AG ("DAG") is not aware of any confirmed field incidents with the subject Takata SDI inflators. However, based on the information above and out of an abundance of caution, DAG will conduct a recall of the vehicles equipped with subject Takata SDI inflators in the United States as identified by JSS/ Takata in the above-mentioned Defect Information Report.

FMVSS 1: NR FMVSS 2: NR

Description of the Safety Risk: According to JSS/Takata, activation of a nondesiccated PSAN inflator with degraded propellant may cause the inflator to rupture. An inflator rupture may cause metal fragments to pass through the air bag and into the vehicle interior at high speed, which may result in injury or death to vehicle occupants.

Description of the Cause: According to JSS/Takata, "The propellant wafers in some of the subject inflators may degrade over time, which could lead to over-aggressive combustion in the event the air bag is activated. Overly aggressive combustion creates excessive internal pressure when the inflator is activated, which may cause the inflator body to rupture. Based upon Takata's investigation to date, the potential for such ruptures occurs in some of the subject inflators after several years of exposure to persistent conditions of high absolute humidity, high temperatures, and high temperature cycling. The potential for rupture may also be influenced by other factors, including the specific vehicle environment, the inflator and propellant configuration, and manufacturing variability."

Identification of Any Warning NR

that can Occur:

## **Supplier Identification:**

### **Component Manufacturer**

Name: TK Holdings / Joyson Safety Systems

Address: NR

NR

Country: NR

#### **Chronology:**

On January 2, 2019, JSS submitted a Defect Information Report to NHTSA per the schedule agreed to with NHTSA in the May 4, 2016 Amendment to the Consent Order. DAG decided to recall the corresponding MY2015 to MY2017 Sprinter vehicles containing the subject Takata SDI inflators consistent with the 3rd Amendment to the Coordinated Remedy Order. This step was taken by DAG in response to JSS/Takata's filing of the Defect Information Report and out of an abundance of caution.

## **Description of Remedy:**

Description of Remedy Program: Daimler Vans USA LLC will conduct a recall to replace the driver-side front

airbag modules in the potentially affected Daimler Vans vehicles. Daimler Vans will provide notice about pre-notice reimbursement to owners in the

customer letter.

How Remedy Component Differs It is DAG's intention to progressively replace the affected Takata Airbags in

from Recalled Component: the affected vehicles with the superior PSAN-free technical solution of

guanidine nitrate (GuNi) based inflators.

Identify How/When Recall Condition The series production began implementation of driver airbags with GuNi was Corrected in Production: inflators in January 2017 for vehicles for the US market. The change to GuNi inflators in series production was fully implemented on July 5, 2017.

#### **Recall Schedule:**

Description of Recall Schedule: Dealers will be notified of the upcoming recall campaign in

approximately March 2019. A copy of all communications will be

provided to NHTSA accordingly.

Customers will be notified about the recall campaign approximately

March 2019.

Planned Dealer Notification Date: MAR 22, 2019 - MAR 22, 2019 Planned Owner Notification Date: MAR 29, 2019 - MAR 29, 2019
