

## Comment from Chales Anonymous

I own a 2008 GMC Yukon and also received a notice in 2016 .. If GM doesn't want to back up defective parts that they put into the vehicles to get them on the Road , sounds like all of Us Owners need to file a Class Action Lawsuit to get GM to replace or at least " Remove" the Defective parts. I have ask my " Mechanic " to remove them , but he said it's a violation of Federal Law, well I guess our Laws are worth more than Mine or My Families Life . it's time for GM to step up and fix these issues ...
