

## Comment from Tom Abbott

Why is GM allowed not to comply with the recall of the air bags on my 2007 Cad Escalade EXT. The notice was issued in 2016. This is ridiculous that it has not been done in 2 years. Called the local dealer he said they do not have the parts. How long will this excuse be tolerated. Passengers will be killed by these defective air bags. How long will GM be allowed to put the safety of their customers at risk.
