

Comment from Nando Favaro

Hello and I have a request/suggestion:

=====

I have a 2008 Yukon which spent the first ten years of its existence in the Phoenix, AZ area. I have imported it to Canada in Sept 2018, but I cannot license it because it has the outstanding recall. So, there is nothing I can do with it except wait.

I have a suggestion: Please use my vehicle as a test deploy of the passenger airbag. It has spent 10 years in the blistering sun of AZ and now one cold winter in Ontario Canada.

Let's get a test dummy in the front seats and blow the airbags. Let's see what happens and you can include these real-life findings in your request for inconsequentiality.

Since I cannot license the vehicle, you could use it for testing.

Please contact me if you're interested in my vehicle.
