

Comment from Nando Favaro

Please take my 2008 Yukon which was in Arizona it's first 10 years of it's life and use the airbag as a test.

I cannot drive it because I cannot register it in Canada because I cannot complete the recall.

I cannot sell it because nobody wants it...except for parts, but nobody wants it for parts either.

It sits in the driveway doing nothing except running 10 minutes per week.

Here in Canada, if I wait until 2023, then it will be exempt from the recall..so yay...another 3 years to wait.

Thank you NHTSA and GM for messing with people's lives and thousands of dollars.

Now, i WOULD DEFINITELY PAY to replace the airbag components so I can register and drive the vehicle.

Oh..I CAN'T. No Parts.

No Parts. No Parts.

I Can't do anything.

Thank you for messing with people lives and thousands of dollars.

Yes, I am really angry because NOTHING IS HAPPENING.

SOoooooo SLOW are the gears.

Government and decision bodies can take their grand old time doing essentially NOTHING.

NOBODY CARES.

You ought to be ashamed for years of inaction.
