

MITSUBISHI MOTORS PROJECTED AVERAGE FUEL ECONOMY

2018 PRE MODEL YEAR REPORT

LIGHT TRUCK

Current Combined Projected
 Average Fuel Economy : 35.0 MPG

Standard : 35.2 MPG^{*1}

At this point in time and based on available best present information, the above projection represents Mitsubishi Motors Corporation and Mitsubishi Motors North America, Inc. average fuel economy for the purposes of the Act. Calculations were performed in accordance with the procedures defined in 40 CFR 600.510.

As required by 49 CFR 537.9, estimated fuel economy values are included in this report. These estimated values are for those running changes that have been submitted to the EPA and are currently involved in the running change approval process. These values were obtained from fuel economy data vehicles which were tested in accordance with applicable exhaust emission test procedures and comply with 2018 model year exhaust emission standards as defined in 40 CFR Part 86.

*1: 2018MY CAFE standard is defined in 49 CFR 533.5.

Standards are calculated by using vehicle footprint bases.

CARLINE	Non-Passenger Automobile Criteria	Applicable : X	Light Truck (Y or N)
OUTLANDER 2WD *1	(1) Transport more than 10 persons.	-	Y
	(2) Provide temporary living quarters.	-	
	(3) Transport property on an open bed.	-	
	(4) Provide, as sold to the first retail purchaser, greater cargo-carrying than passenger-carrying volume, such as in a cargo van; if a vehicle is sold with a second-row seat, its cargo-carrying volume is determined with that seat installed, regardless of whether the manufacturer has described that seat as optional.	-	
	(5) Permit expanded use of the automobile for cargo-carrying purposes or other nonpassenger-carrying purposes through: (i) For non-passenger automobiles manufactured prior to model year 2012, the removal of seats by means installed for that purpose by the automobile's manufacturer or with simple tools, such as screwdrivers and wrenches, so as to create a flat, floor level, surface extending from the forwardmost point of installation of those seats to the rear of the automobile's interior.	-	
	(ii) For non-passenger automobiles manufactured in model year 2008 and beyond, for vehicles equipped with at least 3 rows of designated seating positions as standard equipment, permit expanded use of the automobile for cargo-carrying purposes or other nonpassenger-carrying purposes through the removal or stowing of foldable or pivoting seats so as to create a flat, leveled cargo surface extending from the forwardmost point of installation of those seats to the rear of the automobile's interior.
