

## Scott Leclerc - Comments

the hours of service for regular drivers needs to be updated.

also the roadways need to be in top shape. that hasnt happened since i started driving a car, nevermind a semi.

according to the memos, these trucks drive according, to sensors and cameras, and gps. but construction will detour these big vehicles causing a wreck.

but if we went to the same hos as canada it would be more beneficial to the companies and drivers and wouldnt need these automated trucks
