An insane action. Your going to get people killed. If you want safer highways remove the speed limits on trucks now. Computer controled Uber vehicles are already killing people. 80,000 lb.empty cabs are not going make anything safer. Only humans beings can make the critical decisions needed to operate commercial vehicles in a safer manner. Remove speed restictions,and the hours of service nonsense. The Dot can't drive my truck from a box on the side of the road, in Washington DC.
