

Margaret Gabhart - Comments

I am concerned as a driver how allowing this technology to develop will affect my job. Is the government stopping to think about the ramifications of 3.5 million truck drivers whose jobs will be in jeopardy? You take away our jobs the economy will crumble. Also, have you considered the possibility of Autonomous Commercial trucks being hack and used for terrorism? This thought alone should make you reconsider. Leave the drivers alone and abandon the idea of Autonomous Commercial Trucks. Sincerely, Margaret Gabhart
