This whole automated driving system needs to be completely outlawed! Do you really think it's safe to have an 80,000 lbs. Vehicle driving down the road being operated by a computer, computers can just fail for no reason. Someone's family can be killed in a blink of an eye. The G.P.S system isn't even non fallible and you want to put computer driven trucks on the road. This is completely insane. It needs to be outlawed completely forever.
