

## Andrea Marie - Comments

As a US taxpayer I cannot believe this is even being proposed. You want to place an 80,000 lbs. vehicle on public roads controlled by a computer for testing? You law makers need to quit listening to these corporations and think about the safety of the general public and their families. Im sure the ultimate goal is a fully autonomous truck with no driver, but has anyone thought about how many truck drivers will lose their jobs in the long run? I say No no no
