I don't think self driving Vehicles for the Postal Service is a good idea because there is no replacement for a human person Behind the wheel of an 11 ton or a Tractor Trailer Truck. technology is good in certain instances but for the Safety of the Public and in the best interest of the public I wish you will say no to this idea not to mention the potential job losses that could happen to the hard working men and women of the United States Postal Service who go out on the road each and every day knowing the hazards they may encounter on the roads to deliver the mail if this is aloud to go through it will be more harmful then good Don't let the Postal Service Substitute Safety and jobs for money.
