Ban autonomous trucks. That is a disaster waiting to happen. People are talking about vehicle accidents but are forgetting that these trucks are going to be extremely easy to rob. They will be programmed to avoid hitting a car. A car will stop in front. A car will stop in back. Subdue the unqualified individual in the passenger seat and the cargo is yours. Yeah you may save 1500 a week not paying a driver but lose 600k worth of cargo once and you will be done for. This is my biggest fear. Also why are we willing to allow these multi billion dollar corporations to take the careers of millions of Americans away!? I thought your interests were the same as mine. Provide for my family in a safe and efficient manner. Keep American truckers employed. We have been performing this time honored profession for over 100 years. Why ruin peoples lives.
