

**The following Motor Vehicle Services employees at the Denver Bulk Mail Facility are not in favor of the Self Driverless CMV's and do not wish for these to be adapted by the Postal Service:**

1. It has already caused deaths in the auto pilot modules in some of the cars it has been tested on.
2. Tesla and Uber just recently had deaths related to the cars running into a homeless person and the auto pilot caused a death to the guy in the back of the car.
3. There is no way for this system to navigate its way into our yard and up to the dock doors. We have other drivers going in and out of the facility and there are right of way rules that these CMV's will not be able to obey. This will cause countless accidents as a result.
4. Who will load and unload these trailers as at our BMEU docks the drivers load there loads.
5. How well do they obey traffic signs, patrons at crosswalks, pedestrians on bikes, runners, etc? Will they be able to make quick response decisions that will be needed to interact with everyday hazards.
6. For all of the above reasons our drivers have signed below:

  
  
  
  
  

ROBERT RATTY  
AMAT SHODIEV  
Jimmie Tubbs  
Roderick L. Rand  
LEONARD J. BESELL  
Eudean Maxey
