

ITU ITAR SIGNALS INTEGRITY AUDITOR - Comments

The Technology is not mature nor will it be until flaws in the network and transmitters are corrected this entire event to rush this unproven concept for the purpose of advancing has been spearheaded by the very people that built the flawed network and transmitters -- the sandbagging of facts based upon legacy policy in violation of law vs a private contractors needs even makes this entire event dangerous - any one that has participated in the process of removing rights of fleet owners and humans from transportation systems is ill informed -- further and to forcing fake market share from flawed accounting data sold to government agency -- get out of the regulate private business mind set retrain government parties to be informed first then accept a proposal
