Bringing in these trucks is putting people out of jobs
Closing doors to the small trucking businesses
I have yet to see these trucks run through mountains and adverse weather
Conditions when a normal driver would have to jump out of his truck
And use tire chains.
Safety who does the pretrips on this ?
To make sure not going to lose any equipment off it
And who is going to be responsible for breakdowns
It not just about these trucks it is about people on our roadways
And lost jobs of our industry as we know it.
Stop putting people out of work.
