

Comment from Marcus Sommers

FMCSA-2018-0037 In regards to autonomous trucks, there are far too many safety concerns plaguing this industry already, and now Ai. I really can't believe this is happening, but I am opposed to any autonomous vehicles (especially trucks) from being on our highways around me, my family, and everybody else! The numerous safety issues surrounding this issue are many including mechanical failures, no random roadside DOT inspections, not to mention the potentially vast number of deaths these may bring. Now the issue with the driver...if it's autonomous there should be no need for a driver, however for now there will be a driver/person in the cab. Will the driver need additional training, college, etc...? Nonetheless this will create a massive uptick in unemployment numbers. There is much to say about why this is simply put, NOT GOOD - NOT SAFE for our country! NOT NOW, NOT EVER...!!!
