

Comment from Valerie Scarantino

One of the advantages of owning an electric vehicle (EV) is the fact that it doesn't contribute to noise pollution. I have had my EV for just over a year. Part of the pleasure is the silence. People (including drivers) need to be aware of their surroundings at all times, particularly when in a situation where cars and people may cross paths, such as parking lots, streets, and garages. I have yet to be in a situation that a pedestrian stepped out in front of my car because it was silent. Please don't cave to the ignorant few and ruin one of the joys of EV driving for the rest of us. Thank you.
