

## Comment from James Smylie

I realize that the government is incompetent, but does it really take a year and a half to decide if my airbag is going to kill someone? Deadline for GM was August 2017. It is now December 2019 and no decision has been made. If my airbag explodes and injures or kills someone, who is to blame? Can the NHTSA be sued for being too slow to fix this problem. My daughter's Subaru was fixed without issue for the same problem. Ford has recalled millions of cars because these same air bags have killed people. FIX THE PROBLEM.
