**SECTION 1**  
**TEST PURPOSE AND PROCEDURE**

An FMVSS No. 305 Indicant test, in conjunction with an NCAP side impact test was conducted on the subject 2019 Kia Niro Hybrid LX 5-Door MPV.

The indicant test was conducted in accordance with the Office of Crashworthiness Standards Laboratory Test Procedure, dated September 2012, to determine compliance to the requirements of Federal Motor Vehicle Safety Standard (FMVSS) No. 305, 'Electric-Powered Vehicles: Electrolyte Spillage and Electrical Shock Protection' for the purpose of providing consumer information.

This FMVSS No. 305 Indicant test is part of the MY 2019 New Car Assessment Program Test Program, sponsored by the National Highway Traffic Safety Administration (NHTSA), under contract no. DTNH22-D-14-00355L.

## **SECTION 2**

### **SUMMARY OF TEST RESULTS**

A side impact test was performed by Applus IDIADA KARCO Engineering, LLC. on a 2019 Kia Niro Hybrid LX 5-Door MPV on May 21, 2019. Electrical isolation measurements were taken immediately post-impact and observations were made relating to electrolyte spillage and battery retention. A static rollover was subsequently performed on the subject vehicle and electrical isolation measurements were taken at each stage of the rollover.

Based on the test results, the 2019 Kia Niro Hybrid LX 5-Door MPV appears to meet the requirements for electrolyte spillage, electrical isolation, and battery retention during FMVSS No. 305 indicant testing.

Data sheets, along with pre-test and post-test photographs of the test vehicle, are included in this report to document the test.
