

Comment from Shyla Patera

'My name is Shyla Patera. I wish to comment on DOT's Request for Comments: Ensuring American Leadership in Automated Vehicles: Automated Vehicles We wish, at North Central Independent Living Services, Inc. that people with disabilities will be impacted by automated vehicles. We want and need to be included in the process of determining how automatic automated vehicles will be introduced and utilized as part of our infrastructure. NCILS hopes that American leadership will be undertaken and scientific ingenuity as automated technologies in the vehicle industry are studied and debated as part of any present and future infrastructure policies.
