3.7L Ti-VCT V6

The standard 3.7L V6 delivers responsive performance with 275 horsepower and 260 lb.-ft. of torque. Intake and exhaust valves typically have to open and close at fixed points, compromising performance. But Ti-VCT virtually eliminates this compromise. With its variable control of valve cam timing, Ti-VCT can optimize performance across the entire range of the power band to match the driving condition of the moment.

With the 3.7L engine, Ford offers an available CNG/Propane Gaseous Engine Prep Package* for power conversion to compressed natural gas (CNG) or propane autogas.

*See dealer for details.

Ford reserves the right to change product specifications, pricing and equipment at any time without incurring obligations. Your Ford dealer is the best source of the most up-to-date information on Ford vehicles.

1. MSRP for base vehicle shown excluding destination/delivery fee plus government fees and taxes, any finance charges, any dealer processing charge, any electronic filing charge, and any emission testing charge. Optional equipment not included. Starting A, Z and X Plan price is for qualified, eligible customers and excludes document fee, destination/delivery charge, taxes, title and registration. Not all vehicles qualify for A, Z or X Plan. All Mustang Shelby GT350 and Shelby GT350R prices exclude gas guzzler tax.

2.

EPA-estimated city/hwy mpg for the model indicated. See fueleconomy.gov for fuel economy of other engine/transmission combinations. Actual mileage will vary. On plug-in hybrid models and electric models, fuel economy is stated in MPGe. MPGe is the EPA equivalent measure of gasoline fuel efficiency for electric mode operation.

3.

SYNC® is an optional feature. Don't drive while distracted. Use voice-operated systems when possible; don't use handheld devices while driving. Some features may be locked out while the vehicle is in gear. Not all features are compatible with all phones. Message and data rates may apply. Optional Navigation System map updates cannot be received via Wi-fi® and require a separate update.

28.

The vehicle's electrical system (including the battery), the wireless service provider's signal and a connected mobile phone must all be available and operating for 911 Assist to function properly. These systems may become damaged in a crash. The paired mobile phone must be connected to SYNC, and the 911 Assist feature enabled, in order for 911 to be dialed. When the feature is ON, 911 Assist uses your paired and connected mobile phone to assist occupants to contact emergency services by dialing 911 if your airbag deploys or, on certain vehicles, if the emergency fuel pump shut-off is activated. Aftermarket on-board diagnostic devices may interfere with various vehicle systems including Vehicle Health Report and 911 Assist. To avoid interference, remove the device or contact the device maker for more information on compatibility.
