

Comment from David DeVeau

Agency/Docket Number: DOT-NHTSA-2020-0070

Title: Automated Vehicle Transparency and Engagement for Safe Testing ("AV TEST") Initiative.

My following comments are as an Industrial R&D Engineer and a very active Automotive Safety Advocate.

This request of approval from the Office of Management and Budget for collection of information as defined in this docket must be approved.

It is a critical safety requirement in the development of Automated Vehicle Systems being tested on public roads to have a system for informing the public of types and conditions of testing being performed nationally and locally.

There is more than sufficient proof that it takes Federal leadership to guide State enforcement of public safety.

Both main objectives as clearly defined in this docket by the NHTSA are critical to ensure public safety and to enable public participation of oversight that will ultimately influence responsible compliance to safely testing Automated Vehicle Innovations on public roads.
