

## Comment from David DeVeau

Federal Document Number: 2020-14569

Agency Docket Number: NHTSA-2019-0113

Title: Agency Information Collection Activities; Notice and Request for Comment; Vehicle Information for the General Public

This request of approval from the Office of Management and Budget for continued collection of information as defined in this docket must be approved.

It is a critical safety requirement in the development of all types of passive crash protection and active collision avoidance automotive innovations that a clear and commonly known system of rating and comparing technology is defined.

There is more than sufficient proof that this activity must continue to move forward. There is a national and global interest to establish a common measurement system that will define ability and conditions of safety technology with a global ratings system.

The USA NCAP lead by the NHTSA must be able to maintain a position of global influence and leadership.
