

## Comment from Russell Darrow

Apparently GM is taking the position that they can submit a petition every year and drag this out "forever" with no decision being made. I think it is high time for NHTSA to make a decision one way or the other!

I recently purchased a 2008 Chev Avalanche which falls under this "recall" that has no enforcement or replacement provision. The airbag warning light on the dash is lit. I will soon see if our local dealership is able to address that issue.

Since the Center for Auto Safety has consistently opposed these petitions submitted by GM, I would also urge that they be denied and GM ordered to make the proper replacement or repair.
