

## Comment from James Martin

This would be a big step and expanding mobility options for those utilizing wheelchairs and renting vehicles as needed. I believe we could find ways to do this without compromising safety, and it was also provide economic benefits for the wheelchair-bound as they would be able to rent a wider range of vehicles hopefully at lower price points, expanding the accessibility of this option. As Board President for Creative Living in central Ohio, I believe I have a unique understanding of the potential impact of this initiative on the clients we serve.
