USG 4963 August 12, 2020

Mr. Robert Mazurowski Automotive Engineer U.S Department of Transportation National Highway Traffic Safety Administration 1200 New Jersey Avenue, SE Washington, DC 20590

Re: Information Request Regarding Vehicles Imported by a Registered Importer

Dear Mr. Mazurowski,

This is in response to your inquires regarding the importation of eight General Motors trucks imported from Mexico.

| Vehicle                               | VIN               |
|---------------------------------------|-------------------|
| CK15543-2015 CHEYENNE CREW CAB 4X4    | 3GCUK9EJ4FG388808 |
| CK15543-2015 CHEYENNE CREW CAB 4X4    | 3GCUK9EJ5FG338290 |
| CC15703-2015 CHEVROLET SILVERADO      | 3GCNC9EC1FG192828 |
| CK15543-2015 CHEYENNE CREW CAB 4X4    | 3GCUK9EC3FG395038 |
| CK15543-2015 CHEYENNE CREW CAB 4X4    | 3GCUK9EC6FG327672 |
| CK15543-2015 CHEYENNE CREW CAB 4X4    | 3GCUK9EC8FG326586 |
| CK15703-2015 CHEYENNE REGULAR CAB 4X4 | 1GCNK9EC0FZ202705 |
| CK15543-2015 CHEYENNE CREW CAB 4X4    | 3GCUK9EC6FG345864 |

GM Mexico manufacturers vehicles in Mexico for Mexico, Central America and South America markets. These are economy/entry level vehicles that are not eligible for importation into the US. In general, vehicles engineered in the US for the US market and also sold in Mexico have the same safety content as their US counterpart. This would include the full-size pick-up trucks.

There are some options for pick-up trucks in Mexico that would not be allowed in the US. A good example is the tire pressure monitoring system (TPMS). TPMS is optional in Mexico and any vehicle without TPMS would have to be retrofitted for importation to the US in order to comply with FMVSS 138. There is also an engine and manual transmission combination not available in the US and we have no documentation that demonstrates compliance to FMVSS 102, 114, and 124. As manufactured, all the vehicles listed above have US engine transmission combinations, TPMS and an emission system that complies with US Federal emission regulations. Attached to this letter is a detailed list of regular production options (RPOs) describing the option content of each vehicle.

The pick-up trucks listed above have all the safety content found in a US vehicle. However, there are compliance issues due to the use of metric units versus English and the use of Spanish labeling and ISO symbols instead of English. FMVSS 101, 110, 135 and 208 require English wording either by itself or supplemental to an ISO symbol.

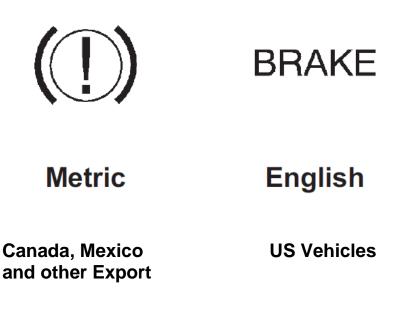

Below is a summary of FMVSS non-compliance for the vehicles listed above.

### **FMVSS 101**

The instrument cluster may or may not comply with FMVSS 101. For the US, the instrument cluster must be English predominant, using miles per hour for vehicle speed and miles for the odometer instead of kilometers per hour and kilometers. Some clusters can be "switched" by the driver to use English or metric units. FMVSS 101 allows for metric units to be used in the instrument cluster but the odometer must be labeled as kilometers. If not labeled, FMVSS 101 assumes the odometer is in miles.

### FMVSS 101/135

The malfunction telltale must use the word "BRAKE" either alone or in combination with the ISO symbol used in Canada, Mexico and other export countries.

Note that retrofitting a Mexican instrument cluster with a US version will correct this and the odometer issue noted for FMVSS 101 previously.

### **FMVSS 135**

### Spanish/Arabic Brake Fluid Warning Label

This label is installed on or near the brake fluid reservoir. If it obscures the English language wording molded into the brake fluid reservoir, it should be removed.

### **FMVSS 208**

The passenger airbag telltale does not comply with FMVSS 208. Different symbols are used depending if English or metric:

Canada and Mexico With a Passenger Sensing System

### United States with a Passenger Sensing System

This telltale is located in overhead console and will need to be retrofitted.

The visor has ISO symbols instead of English words.

Mexico Label on Driver's Side Only

# Label used on US and Canada Vehicles – Driver and Passenger

GM uses this label in the US and Canada. The RI does not have to use a bi-lingual label and may be able to install one that is only in the English language if they can find a supplier. GM does not offer an "English only" label.

## **FMVSS 110**

The tire placard looks like:

|          | INFORMACIÓN     | N SOBRE NEUMÁTICOS        | Y CARGA    |
|----------|-----------------|---------------------------|------------|
| <b>W</b> | NO. DE ASIENTOS | TOTAL 4 DEL 2             | TRA 2      |
|          |                 | MÁX. CAP. DE CARGA 332 KG | / 732 LBS. |
| NEUM     | TAMAÑO ORIGINAL | PRES NEUM FRÍOS           |            |
| DEL      | 245/45ZR20 Y    | 250 kPa, 36 PSI           | <b>M</b>   |
| TRA      | 275/40ZR20 Y    | 250 kPa, 36 PSI           |            |
| REF      | NONE            | NONE                      |            |

Example of tire placard used in Mexico (Values listed are not for any of the above vehicles)

It will need to be changed to:

|            | TIRE AN                       | D LOADING INFORM              | ATION   |
|------------|-------------------------------|-------------------------------|---|
|            | SEATING CAPACITY              | TOTAL 2 FRONT 2               | REAR 0  |
| The combin | ed weight of occupants and ca | rgo should never exceed 238 k | g or 525 lbs.   |
| TIRE       | ORIGINAL SIZE                 | COLD TIRE PRESSURE            | REAR 0<br>g or 525 lbs.<br>SEE OWNER'S<br>MANUAL FOR<br>ADDITIONAL<br>INFORMATION |
| FRONT      | 245/35ZR19                    | 210 kPa, 30 PSI               | ADDITIONAL  |
| REAR       | 305/30ZR20                    | 210 kPa, 30 PSI               | INFORMATION   |
| SPARE      | NONE                          | NONE                          |   |

Example of US tire placard (Values listed are not for any of the above vehicles)

### **Emission Label**

Vehicles sold in Mexico do not have an underhood emission label. These vehicles have the same emission content as a US vehicle and an emission label with the correct certification number needs to be installed.

### FMVSS 138 (TPMS) and Tire Regulations FMVSS 110 and 139

Since these vehicles are used and have probably had at least one change of tires, GM cannot determine if the replacement tires comply with FMVSS 138 and all relevant tire regulations. In summary:

- The tires must have the "DOT" symbol molded into the sidewall of the tire. Most replacement tires in Mexico do not comply with FMVSS 139. The tires will need to be replaced.
- The replacement tires must have adequate load carrying capabilities suited for the vehicle. Overrated tires should not be an issue, but if the tires are underrated it could present a dangerous overloading condition.
- Replacement tires may have a different recommended cold tire inflation pressure than the original tires installed on the vehicle. The replacement placard may have different values than the original label.
- Any change in tire pressure may require that the TPMS be recalibrated so that the triggering threshold used to activate the TPMS low tire pressure telltale complies with the requirements in FMVSS 138.
- If accessories were added that increased the weight of the vehicle the tires may need to be upgraded to handle the extra weight. This would also require a change to the vehicle capacity weight information found on the tire placard required by FMVSS 110.

#### Other Considerations

Any part replaced due to normal wear and tear such as brake pads need to comply with FMVSS standards. Any part replaced due to a collision such as vehicle lighting, air bags, etc. must also comply with FMVSS standards.

If you have any questions regarding this information, please contact Jeff Upchurch of this office, Matthew Jerinsky of our Washington, DC office or me.

Sincerely,

John a Madulen

John A. Magdaleno, Senior Manager Safety Regulations and Certification
