NATIONAL HIGHWAY TRAFFIC SAFETY ADMINISTRATION
CHILD RESTRAINT EASE OF USE RATINGS
2020 RATING YEAR

PREPARED BY:
ALPHA TECHNOLOGY ASSOCIATE, INC.
2810 OLD LEE HIGHWAY, SUITE 120
FAIRFAX, VA 22031

SUBMISSION DATE:
DECEMBER 17, 2020

PREPARED FOR:
U.S. DEPARTMENT OF TRANSPORTATION
NATIONAL HIGHWAY TRAFFIC SAFETY ADMINISTRATION
1200 NEW JERSEY AVENUE, S.E., W43-410
WASHINGTON, DC 20590

Summary

NHTSA's Ease of Use program rates the usability of child restraints on a scale from one to five stars. The ratings contained in this document constitute all ratings conducted under the 2020 Ease of Use program.

All ratings were conducted by Alpha Technology Associate, Inc. under contract number DTNH22-13-D-00311L.

Seat Make/Model	Usability of Labels Rating	Usability of Manual Rating	Ease of Securing the Child Rating	Ease of Installation in Vehicle Rating	Overall Rating

Evaluation of Labels

	A	B	C	Notes
Clear indication of child's size range for this mode. Is there additional information on the CRS about how the child should fit in it?	Separate, clear, complete height and weight information directly next to the illustration. Additional size information included as a picture. ☐	Separate, clear, complete height and weight information directly next to the illustration. Additional size information included as short, simple text. ☐	Incomplete text as indicated, text independent of illustration, or no illustration, and/or no mention of additional sizing information. ☑	☑ No picture of child in CRS. ☑ Additional sizing info missing.
All methods of installing the seat in this mode are clearly indicated, including with lower anchors, lap belt only, and lap/shoulder belt, with and without the base as necessary.	Illustrated clearly with CR in vehicle seat. **No need** to read text although illustrations should be labeled for each method of installation. ☑		Method missing, partially illustrated, or no illustrations at all. CRS may be shown without any vehicle seat at all. **Must** read text. ☐	
Does the CRS indicate the correct harness slot height for this mode? Is there additional information on the CRS about how the shoulder straps should fit for this mode?	Yes, there is a graphic or contrasting text indicating the correct harness slots to use for this mode. Additional harness adjustment information is conveyed using a picture. ☑	Yes, there is text indicating the correct harness slots to use for this mode but they may be the same color as the shell. Additional harness adjustment information is included but may be text only. ☐	No indication of correct slots to use for this mode (for applicable multi-mode CRS) and/or no mention of additional sizing information. ☐	
Vehicle belt & flexible lower anchor path labeling and routing.	Illustrated clearly with no need to read text in order to route seatbelts. Contrasting label is directly next to the corresponding belt path on both sides of CRS. ☑	Belt routing path label is only contrasting on one side but would otherwise fulfill "A" criteria. ☐	Belt routing label not next to corresponding path. Belt routing path is only labeled on one side. Routing requires reading text or is otherwise not obvious from illustration. May also be obscured by seat pad. ☐	
Shows how to prepare and use lower attachments.	Clear illustrations show how to route and attach lower anchors to vehicle for using the CRS in this mode. One or two words per idea are OK for clarification. ☑	Illustrations plus written instructions provided. **Need** to read text to perform entire operation. ☐	Text-heavy instructions only provided or no instructions at all provided. Partial instructions; some steps missing. ☐	
Durability of labels.	Sticky label(s) or other method of technology label not peeling. ☑		Sticky label(s) are already peeling when restraint removed from box. ☐	

Make & Model   Britax One4Life Clicktight   Model #   E1C277S

Evaluation of Instructions

	A	B	C	Notes
Is the owner's manual easy to find when the CRS is taken out of the box?	Attached to the child restraint in a clearly visible location. ☐		Attached to the child restraint in a hard-to-find location or not attached to the seat at all. ☑	☑ Manual not attached to seat.
Evaluate the storage system for accessing the manual in this mode.	It is obvious and easy to use. The manual can be accessed when the CRS is installed in this mode of use. ☐	It is obvious and easy to use, but the manual cannot be accessed when the CRS is installed in this mode of use. ☐	The designated storage system isn't obvious or it is difficult to use regardless of mode of use. Can easily fall of off carrier if removed. ☑	☑ Manual storage difficult to find. Storage system is behind seat pad; label tag is not showing.
Clear indication of child's size range. Is there additional information in the manual about how the child should fit?	Separate, clear, complete height and weight information directly next to the illustration. Additional size information included alongside a picture. ☐	Separate, clear, complete height and weight information directly next to the illustration. Additional size information included as short, simple text. ☐	Incomplete text as indicated, text independent of illustration, or no illustration, and/or no mention of additional sizing information. ☑	☑ No picture of child in CRS.
All methods of installing the seat in this mode are clearly indicated, including with lower anchors, lap belt only, and lap/shoulder belt, with and without the base as necessary.	Illustrated clearly with CR in vehicle seat. No need to read text although illustrations should be labeled for each method of installation. ☑		Method missing, partially illustrated, or no illustrations at all. CRS may be shown without a vehicle seat. ☐	
Warning to avoid placing a rear-facing child restraint in front of an active airbag .	Separate from unrelated warnings and illustrated; has its own page or other very clear demarcation. Also remarks that the safest place for all children is in the rear. ☑	Illustrated but buried within other unrelated warnings, for example, in a bulleted list. Must still contain a warning that the safest place for children is in the rear AND specifically mention the dangers of RF CRS and airbags. ☐	Buried among other text, incomplete warning, or no warning at all. ☐	
Instructions for routing both lap belt and lap/shoulder belt for this mode, including details about different vehicle seatbelts and how this CRS should be installed with each of them.	Illustrated clearly. No need to read text in order to route seatbelt; should be obvious from diagrams. Manual includes complete instructions for determining vehicle seatbelt type. ☐	Illustrated clearly. No need to read text in order to route seatbelt; should be obvious from diagrams. Instructions for determining vehicle seatbelt type are present but may be incomplete. ☑	Unclear instructions that require reading text. No mention of how to use vehicle seatbelts correctly. ☐	☑ Seatbelt section is incomplete.
Shows how to prepare and use lower attachments.	Clear illustrations show how to route and attach lower anchors to vehicle for using the CRS in this mode. One or two words per idea are OK for clarification. ☑	Illustrations plus written instructions provided. **Need** to read text to perform entire operation. ☐	Text-heavy instructions only provided or no instructions at all provided. Partial instructions; some step missing. ☐	
For this mode, information in written instructions and on labels match.	Yes. ☑		No. Please describe the conflict under notes. ☐	

Make & Model _____ Britax One4Life Clicktight _____   Model # _____ E1C277S _____

Securing the Child

	A	B	C	Notes
All functional parts (i.e., required for correct use as per instructions) including seat pad or cover attached and ready to use, harness slots and crotch strap in their lowest settings.	Yes. ☐		No, not ready to use regardless of how difficult the assembly may be. May direct user to manual or is otherwise difficult. Tools may be required. Please describe under notes. ☑	☑ CRS is not set for youngest mode when removed from pkg.
Does the harness clip require threading to secure properly? Is it labeled to indicate its proper positioning on the child?	No, and harness clip is labeled. ☑	No, but harness clip is not labeled. ☐	Yes. ☐	
Evaluate the ease of inserting the shoulder portions of the harness buckle for this seat.	Each upper portion of the shoulder harness may be inserted separately. ☑	"Puzzle" buckle with an intermediate method of holding the shoulder portions together. ☐	"Puzzle" buckle with no intermediate method of holding the shoulder portions together ☐	
Access to & use of harness adjustment system.	Can access harness system when installed, one hand to tighten (one pull system). Possible 2 hands to loosen (i.e., one to depress button and one to loosen the harness. ☑		Does not meet "A" criteria. Please describe under notes. ☐	
Evaluate the number and adjustability of the harness slots in the shell and the pad.	The number of slots in the pad & shell match, and there are at least 3 OR the system is adjustable to at least 3 heights. ☑		Does not meet "A" criteria. Please describe under notes. ☐	
Visibility & alignment of harness slots for systems that must be re-threaded.	Can see through all harness slots. All slots in pad are aligned with slots in shell. ☐	Cannot see through all harness slots because they are small or are misaligned with the shell. ☐	Cannot see all harness slots because there is something in way for this mode, e.g. an insert, a head hugger, or body pillow. ☐	☑ n/a, system does not require re-thread
Ease of adjusting the harness for child's growth.	No need to rethread system. No mandatory pieces exist that may become loose when adjusting system. ☑	No need to rethread system, but may be otherwise difficult to adjust. ☐	Harness must be rethread to adjust. Loose mandatory pieces may be present. Could misroute or incorrectly resecure harness. ☐	
Ease of conversion **to** RF from all other possible modes of use.	Simple operation with only a single or dual action. Illustrations and instructions on seat showing mode change. ☐	Simple operation but multiple actions are required. Illustrations may be missing from the label, requiring the user to read the manual. ☐	Operation is difficult, requiring many complicated steps that must be followed in the manual. ☑	☑ No illustrations on the label showing conversion. ☑ Flexible LATCH belt must be rerouted. ☑ n/a, single mode CRS
Ease of re-assembly if pad/cover removed for cleaning.	No loose parts. Easy to remove and reattach the padding. No rethreading required. ☑	Harness system may need to be rethreaded to re-assemble, but no loose parts exist. ☐	Loose parts may exist, including the harness system. Harness system may need to be rethreaded to re-assemble. May even need hand tool(s). ☐	
Ease of adjusting/removing shield.	Clear illustration on CRS, simple action, shield marked. ☐	Need to read text, simple action, shield not marked. ☐	Other tool(s) required. ☐	☑ n/a, no shield ☐ n/a, shield not adjustable

NHTSA Ease of Use Rating Form - 2020

Infant Only Restraints, Convertible RF Mode, or 3-in-1 RF Mode

Make & Model _____ Britax One4Life Clicktight _____   Model # _____ E1C277S _____

Vehicle Installation Features

		A	B	C	Notes
Ease of routing vehicle belt or LATCH lower attachment straps (if flexible) for installation in this mode, with and without base if separate.		A 95th percentile male hand can route the seatbelt easily and comfortably. The padding does not need to be moved in order to route the belt. ☑		The belt path does not accommodate a 95th percentile male hand, or has to be routed under the CRS padding for one or more modes of RF installation. ☐	
Can vehicle belt or lower LATCH straps (if flexible) interfere with harness (including crotch strap) or be routed incorrectly with respect to other seat elements such as padding?		No contact or interference possible. ☑		Possible contact or misrouting. Please describe this potential under **notes**. ☐	
Ease of attaching/removing infant seat from base.		Simple to attach, difficult to mistakenly secure carrier to base. One step release mechanism easy to reach. ☐		Difficult to attach carrier securely to base. Easy to mistakenly secure carrier to base. Release mechanism may be difficult to reach. Carrier has the potential to appear correctly installed when it is not. ☐	☑ n/a, no separate base
Ease of use of any RF belt positioning feature on CRS such as a lock-off.		Simple to use with instruction on CRS. ☑	Simple to use but must refer to manual. ☐	Multiple steps, confusing to use even with manual. ☐	n/a, no belt positioning feature
Evaluate the seat's angle feedback device and the recline capabilities of the base (if separate).	*Convertible, 3-in-1*	Obvious, separate recline device. Adjustable to at least three levels of recline for this mode. ☑	Indication on a label or text in the same color as the CRS shell used as the recline device. Adjustable to at least three levels of recline for this mode. ☐	No feedback device on CRS, or does not have three levels of recline for this mode. ☐	n/a, has separate base
	Carrier with separate base	Obvious, separate recline device (may only be on the carrier since it is more critical). Base is adjustable so that it allows for at least three levels of recline for this mode. ☐	Base is adjustable so that it allows for at least three levels of recline for this mode. However, does not meet "A" criteria for separate recline device. ☐	Base does not have three levels of recline for this mode. ☐	☑ n/a, no separate base
Do the lower anchors require twisting to remove from the vehicle?		No, system fully retracts from vehicle anchors with release mechanism. ☐	No twisting required but secondary action required to remove lower anchor from seat bight. ☑	Yes, user must twist lower anchors to remove from vehicle. ☐	☑ Buttons on lower attachments. n/a, no lower anchors
Evaluate the storage system for the lower anchors when not in use.		Simple, obvious, dedicated, labeled storage system. Or, lower anchors that completely retract when not in use. ☑	Storage system exists but may easily overlooked. ☐	No separate storage system exists, or user is directed to hook lower anchors together when not in use. ☐	n/a, no lower anchors
Is there an indication on the carrier itself indicating where to put the handle when installed in vehicle?		Yes. ☐		No. ☐	☑ n/a, no separate carrier

Evaluation of Labels

	A	B	C	Notes
Clear indication of child's size range for this mode. Is there additional information on the CRS about how the child should fit in it?	Separate, clear, complete height and weight information directly next to the illustration. Additional size information included as a picture. ☐	Separate, clear, complete height and weight information directly next to the illustration. Additional size information included as short, simple text. ☐	Incomplete text as indicated, text independent of illustration, or no illustration, and/or no mention of additional sizing information. ☑	☑ No picture of child in CRS. ☑ Additional sizing info missing.
All methods of installing the seat in this mode are clearly indicated, including with lower anchors, lap belt only, and lap/shoulder belt.	Illustrated clearly with CRS in vehicle seat. Illustrations should be labeled for each method of installation, must include label on each mode that indicates tether should be used. ☐	*(shaded)*	Method missing, partially illustrated, or no illustrations at all. CRS may be shown without a vehicle seat. Illustrations may not be completely labeled for each method of installation, for example, may not be labeled indicating that tether should be in use for all FF installations. ☑	☑ Tether is not labeled.
Does the CRS indicate the correct harness slot height for this mode? Is there additional information on the CRS about how the shoulder straps should fit for this mode?	Yes, there is a graphic or contrasting text indicating the correct harness slots to use for this mode. Additional harness adjustment information is conveyed using a picture. ☑	Yes, there is text indicating the correct harness slots to use for this mode but they may be the same color as the shell. Additional harness adjustment information is included but may be text only. ☐	No indication of correct slots to use for this mode (for applicable multi-mode CRS) and/or no mention of additional sizing information. ☐	
Vehicle belt & flexible lower anchor path labeling and routing.	Illustrated clearly with no need to read text in order to route seatbelts. Label is directly next to the corresponding belt path on both sides of CRS. ☑	Belt routing path label is only contrasting on one side but would otherwise fulfill "A" criteria. ☐	Belt routing label not next to corresponding path. Belt routing path is only labeled on one side. Routing requires reading text or is otherwise not obvious from illustration. May also be obscured by seat pad. ☐	
Shows how to prepare and use lower attachments.	Clear illustrations show how to route and attach lower anchors to vehicle for using the CRS in this mode. One or two words per idea are OK for clarification. ☑	Illustrations plus written instructions provided. Need to read text. ☐	Text-heavy instructions only provided or no instructions at all provided. Partial instructions; some step missing. ☐	
Shows how to prepare and use the tether.	Clear illustrations show how to route and attach tether to vehicle for using the CRS in this mode. One or two words per idea are OK for clarification. ☑	Illustrations plus written instructions provided. However, need to read text in order to know to complete all steps. ☐	Text-heavy instructions only provided or no instructions at all provided. Partial instructions; some step missing. ☐	
Durability of labels.	Sticky label(s) or other method of technology label not peeling. ☐	*(shaded)*	Sticky label(s) are already peeling when restraint removed from box. ☐	☑ n/a not youngest mode for this CRS

NHTSA Ease of Use Rating Form - 2020

Forward Facing Only, Convertible FF Mode, Combination FF Mode, or 3-in-1 FF Mode

Make & Model ___Britax One4Life Clicktight___   Seat # (on tag) ___E1C277S___

Evaluation of Instructions

	A	B	C	Notes
Is the owner's manual easy to find when the CRS is taken out of the box?	Attached to the child restraint in a clearly visible location. ☐		Attached to the child restraint in a hard-to-find location or not attached to the seat at all. ☐	☑ n/a not youngest mode for this CRS
Evaluate the storage system for accessing the manual in this mode.	It is easy to use and it is difficult for the manual to fall out. The manual can be accessed when the CRS is installed in this mode of use. ☐	It is easy to use, but the manual cannot be accessed when the CRS is installed in this mode of use. ☐	The designated storage system is difficult to use or cannot be accessed regardless of mode of use. ☑	☑ Manual storage difficult to find.
Clear indication of child's size range. Is there additional information in the instructions about how the child should fit?	Separate, clear, complete height and weight information directly next to the illustration. Additional size information included alongside a picture. ☐	Separate, clear, complete height and weight information directly next to the illustration. Additional size information included as short, simple text. ☐	Incomplete text as indicated, text independent of illustration, or no illustration, and/or no mention of additional sizing information. ☑	☑ No picture of child in seat.
All methods of installing the seat in this mode are clearly indicated, including with lower anchors, lap belt only, and lap/shoulder belt, with reference to using the tether with each one.	Illustrated clearly with CRS in vehicle seat. No need to read text although illustrations should be labeled for each method of installation. ☑		Method missing, partially illustrated, or no illustrations at all. CRS may be shown without a vehicle seat, or tether may not be labeled. ☐	
Indication that the safest place in a vehicle for children is the rear seat.	Separate from unrelated warnings and illustrated; has its own page or other very clear demarcation. ☑	Buried within other warnings, for example, in a bulleted list. ☐	Buried among other text or no warning at all. ☐	
Instructions for routing both lap belt and lap/shoulder belt for this mode, including details about different vehicle seatbelts and how this CRS should be installed with each of them.	Illustrated clearly. No need to read text in order to route seatbelt; should be obvious from diagrams. Manual includes complete instructions for determining vehicle seatbelt type. ☐	Illustrated clearly. No need to read text in order to route seatbelt; should be obvious from diagrams. Instructions for determining vehicle seatbelt type are present but may be incomplete. ☑	Unclear instructions that require reading text. No mention of how to use vehicle seatbelts correctly. ☐	☑ Vehicle seatbelt section incomplete.
Shows how to prepare and use lower attachments & tether.	Clear illustrations show how to route and attach lower anchors and tether to vehicle for using the CRS in this mode. One or two words per idea are OK for clarification. ☑	Illustrations plus written instructions provided. Need to read text to perform entire operation. ☐	Text-heavy instructions only provided or no instructions at all provided. Partial instructions; some step missing. ☐	
For this mode, information in written instructions and on labels match.	Yes. ☑		No. Please describe the conflict under **notes**. ☐	

Make & Model   Britax One4Life Clicktight   Seat # (on tag)   E1C277S

Securing the Child

	A	B	C	Notes
All functional parts (i.e., required for correct use as per instructions) including seat pad or cover attached and ready to use, harness slots and crotch strap in their lowest settings. Tether must also come attached to CRS.	Yes. ☐		No, not ready to use regardless of how simple the assembly may be. May direct user to manual or is otherwise difficult. Tools may be required. Please describe under **notes**. ☐	☑ n/a not youngest mode for this CRS
Does the harness clip require threading to secure properly? Is it labeled to indicate its proper positioning on the child?	No, and harness clip is labeled. ☑	No, but harness clip is not labeled. ☐	Yes. ☐	
Evaluate the ease of inserting the shoulder portions of the harness buckle for this seat.	Each upper portion of the shoulder harness may be inserted separately. ☑	"Puzzle" buckle with an intermediate method of holding the shoulder portions together. ☐	"Puzzle" buckle with no intermediate method of holding the shoulder portions together ☐	
Access to & use of harness adjustment system.	Can access harness system when installed, one hand to tighten (one pull system). Possible 2 hands to loosen (i.e., one to depress button and one to loosen the harness. ☑		Cannot reach the adjustment mechanism in this mode when correctly installed and/or other method of harness adjustment such as those that require two hands, re-threading, or removal of CRS from vehicle. ☐	
Evaluate the number and adjustability of the harness slots in the shell and the pad.	The number of slots in the pad & shell match, and there are at least 3 OR the system is adjustable to at least 3 heights. ☑		Does not meet "A" criteria. ☐	
Visibility & alignment of harness slots for systems that must be re-threaded.	Can see through all harness slots. All slots in pad are aligned with slots in shell. ☐	Cannot see through all harness slots because they are small or are misaligned with the shell. ☐	Cannot see all harness slots because there is something in way for this mode, e.g. an insert, a head hugger, or body pillow. ☐	☑ n/a, system does not require re-thread
Ease of adjusting the harness for child's growth.	No need to rethread system. Simple, obvious operation of the harness adjustment system. No mandatory pieces exist that may become loose when adjusting system. ☑	No need to rethread system, but may be otherwise difficult to adjust. ☐	Harness must be rethread to adjust. Loose mandatory pieces may be present. Could misroute or incorrectly resecure harness, even for a no-thread system. ☐	
Ease of conversion **to** FF from all other possible modes of use.	Simple operation with only a single or dual action. Illustrations on seat showing mode change. ☐	Simple operation but multiple actions are required. Illustrations may be missing from the label, requiring the user to read text which must be present on CRS. ☐	Operation is difficult, requiring many complicated steps. The instructions may be confusing, or missing altogether. ☑	☑ No illustrations on the label. ☑ Flexible LATCH belt must be rerouted. ☐ n/a, single mode CRS
Ease of re-assembly if pad/cover removed for cleaning.	No loose parts. Easy to remove and reattach the padding. No rethreading required. ☑	Harness system may need to be rethreaded to re-assemble, but it is a very simple system. No loose parts exist. ☐	Loose parts may exist, including the harness system. Harness system may need to be rethreaded to re-assemble. May even need hand tool(s). ☐	
Ease of adjusting/removing shield.	Clear illustration on CRS, simple action, shield marked. ☐	Need to read text, simple action, shield not marked. ☐	Other tool(s) required. ☐	☑ n/a, no shield ☐ n/a, shield not adjustable

NHTSA Ease of Use Rating Form - 2020

Forward Facing Only, Convertible FF Mode, Combination FF Mode, or 3-in-1 FF Mode

Make & Model _____Britax One4Life Clicktight_____   Seat # (on tag) _____E1C277S_____

Vehicle Installation Features

	A	B	C	Notes
Ease of routing vehicle belt or LATCH lower attachment straps (if flexible) for installation in this mode.	A 95th percentile male hand can route the seatbelt easily and comfortably. The padding does NOT need to be moved in order to route the belt. ☑		The belt path does not accommodate a 95th percentile male hand, or has to be routed under (not past, which is OK) the CRS padding for FF installation. ☐	
Can vehicle belt or lower LATCH straps (if flexible) interfere with harness (including crotch strap) if routed correctly?	No contact or interference possible. ☑		Possible contact or misrouting. Please describe this potential under **notes**. ☐	
Ease of use of any FF belt positioning feature on CRS such as a lock-off.	Simple to use with instruction on CRS. ☑	Simple to use but must refer to manual. ☐	Multiple steps, confusing to use even with manual. ☐	☐ n/a, no belt positioning feature
Evaluate the tether on this CRS.	Only one hand required to tighten and release the tether. ☑		Does not meet "A" criteria. ☐	☐ no tether required
Do the lower anchors require twisting to remove from the vehicle?	No, system fully retracts from vehicle anchors with release mechanism. ☐	No twisting required but secondary action required to remove lower anchor from seat bight. ☑	Yes, user must twist lower anchors to remove from vehicle. ☐	☑ Push-button connectors.
Evaluate the storage system for the lower anchors & tether when not in use.	Simple, obvious, dedicated, labeled storage system. Or, lower anchors or a tether that completely retracts when not in use. ☐	Storage system exists but may be easily overlooked. ☑	No separate storage mentioned or user is directed to hook lower anchors together or with tether when not in use. ☐	☑ Storage system is not clearly labeled.

Evaluation of Labels

	A	B	C	Notes
Clear indication of child's size range for this mode. Is there additional information on the CRS about how the child should fit in it?	Separate, clear, complete height and weight information directly next to the illustration. Additional size information included as a picture. ☑	Separate, clear, complete height and weight information directly next to the illustration. Additional size information included as short, simple text. ☐	Incomplete text as indicated, text independent of illustration, or no illustration, and/or no mention of additional sizing information. ☐	
All method(s) of installing this CRS correctly are indicated (high back and/or low back).	Illustrated clearly with CR in vehicle seat. No need to read text although illustrations should be labeled for each method of installation. ☑		No illustrations at all or a method of installation is missing, or may be difficult to tell one method of installation from another. ☐	
Vehicle belt use & vehicle belt path labeling.	Illustrated clearly with no need to read text in order to route seatbelts. Label is directly next to the corresponding belt path or positioning device on both sides of CRS. ☑	Belt routing path label is only contrasting on one side but would otherwise fulfill "A" criteria. ☐	Belt routing label not next to corresponding path. Belt routing path or device is only labeled on one side. Routing requires reading text or is otherwise not obvious from illustration. May also be obscured by seat pad. ☐	
Label warning against using a lap belt only.	Illustration included warning user against using the CRS with the lap belt only for this mode. ☑	Text warning the user not to use the lap belt only in this mode. ☐	No written or illustrated warning. ☐	☐ n/a, may be used with lap belt
Durability of labels.	Sticky label(s) or other method of technology label not peeling. ☐		Sticky label(s) are already peeling when restraint removed from box. ☐	☑ n/a not youngest mode for this CRS

NHTSA Ease of Use Rating Form - 2020
Booster, Combination Seat in BPB Mode, or 3-in-1 in BPB Mode

Make & Model _____Britax One4Life Clicktight_____   Model # _____E1C277S_____

Evaluation of Instructions

	A	B	C	Notes
Is the owner's manual easy to find when the CRS is taken out of the box?	Attached to the child restraint in a clearly visible location. Finding it in a very obvious storage system is acceptable. ☐		Attached to the child restraint in a hard-to-find location or not attached to the seat at all. This includes when it is found in an obscured storage system. ☐	☑ n/a not youngest mode for this CRS
Evaluate the storage system for accessing the manual in this mode.	It is obvious and easy to use. The manual can be accessed when the CRS is installed in this mode of use. ☐	It is obvious and easy to use, but the manual cannot be accessed when the CRS is installed in this mode of use. ☐	The designated storage system isn't obvious or it is difficult to use regardless of mode of use. ☑	☑ Manual storage difficult to find.
Clear indication of child's size range. Is there additional information somewhere in the manual about how the child should fit?	Separate, clear, complete height and weight information directly next to the illustration. Additional size information included alongside a picture. ☑	Separate, clear, complete height and weight information directly next to the illustration. Additional size information included as short, simple text. ☐	Incomplete text as indicated, text independent of illustration, or no illustration, and/or no mention of additional sizing information. ☐	
All methods of installing this seat with a lap/shoulder belt including low back and high back modes if they exist.	Illustrated clearly with CR in vehicle seat. No need to read text although illustrations should be labeled for each method of installation. ☑		No illustration, text only. May be illustrated, but not all modes shown (e.g. tether not shown). ☐	
Indication that the safest place in a vehicle for children is the rear seat.	Separate from unrelated warnings and illustrated; has its own page or other very clear demarcation. ☑	Buried within other warnings, for example, in a bulleted list. ☐	Buried among other text or no warning at all. ☐	
Instructions for routing lap/shoulder belt alongside a picture warning against using a lap belt only.	Illustrated clearly with CR on vehicle seat. No need to read text in order to route seatbelt. Diagram warning against using a lap belt only is included in this section of the manual unless seat may be used correctly with one. ☑	Illustrated, outlined, but may not be pictured on a vehicle seat. Text warning not to use with a lap belt (only if it is a misuse) included in this section of the manual. ☐	Unclear instructions that require reading text. Fails to caution against the use of lap-belt only in this section of the manual (if this is a misuse). If the warning is listed somewhere else in the manual, assign a "C". ☐	
For this mode, information in written instructions and on labels match.	Yes. ☑		No. Please describe the conflict under **notes**. ☐	

NHTSA Ease of Use Rating Form - 2020
Booster, Combination Seat in BPB Mode, or 3-in-1 in BPB Mode

Make & Model ___Britax One4Life Clicktight___   Model # ___E1C277S___

Securing the Child

	A	B	C	Notes
All functional parts (i.e., required for correct use as per instructions) including seat pad or cover attached and ready to use, harness slots and crotch strap in their lowest settings.	Yes. ☐		No, not ready to use regardless of how difficult the assembly may be. May direct user to manual or is otherwise difficult. Tools may be required. Please describe under notes. ☐	☑ n/a not youngest mode for this CRS
Ease of conversion from any other mode of use **to** a booster.	Simple operation with only a single or dual action. Illustrations on seat showing mode change. ☐	Simple operation but multiple actions are required. Illustrations may be missing from the label, requiring the user to read text which must be present on CRS. ☐	Operation is difficult, requiring many complicated steps. The instructions may be confusing, or missing altogether. ☑	☑ No illustrations on the label. ☐ n/a, booster only
Ease of conversion **from** high back **to** low back booster.	Simple action. Illustration provided on seat showing mode change. ☐	Simple action but no specific illustration is provided on seat. Text may be present. ☐	Action difficult or need additional instructions not found on CRS labels. Tools may be required. ☐	☑ n/a, combination or 3-in-1 ☐ n/a, booster may not be converted
Ease of re-assembly if pad/cover removed for cleaning.	No loose parts. Easy to remove and reattach the padding. ☑		Loose parts. May even need hand tool(s). ☐	

Vehicle Installation Features

	A	B	C	Notes
Ease of use of any separate shoulder belt positioning or guide hardware on CRS.	Very simple action requiring one hand to use. ☑	Two hands to use but action is simple. ☐	Multiple steps to position belt, most likely need to read instructions for clarification. ☐	☐ n/a, no separate device
Does belt-positioning guide or device allow slack to occur? Does it also prevent the shoulder portion from slipping accidentally?	No. The shoulder belt can move freely through its positioning device. In addition, the shoulder belt cannot slip out of the device accidentally. ☑	No. The shoulder belt can move freely through its positioning device. However, the shoulder belt could slip out of the device accidentally. ☐	Yes. The shoulder belt movement is restricted by the belt-positioning device. ☐	☐ n/a, no separate device

Evaluation of Labels

	A	B	C	Notes
Clear indication of child's size range for this mode. Is there additional information on the CRS about how the child should fit in it?	Separate, clear, complete height and weight information directly next to the illustration. Additional size information included as a picture. ☑	Separate, clear, complete height and weight information directly next to the illustration. Additional size information included as short, simple text. ☐	Incomplete text as indicated, text independent of illustration, or no illustration, and/or no mention of additional sizing information. ☐	
All methods of installing the seat in this mode are clearly indicated, including with lower anchors, lap belt only, and lap/shoulder belt, with and without the base as necessary.	Illustrated clearly with CR in vehicle seat. **No need** to read text although illustrations should be labeled for each method of installation. ☑		Method missing, partially illustrated, or no illustrations at all. CRS may be shown without any vehicle seat at all. **Must** read text. ☐	
Does the CRS indicate the correct harness slot height for this mode? Is there additional information on the CRS about how the shoulder straps should fit for this mode?	Yes, there is a graphic or contrasting text indicating the correct harness slots to use for this mode. Additional harness adjustment information is conveyed using a picture. ☑	Yes, there is text indicating the correct harness slots to use for this mode but they may be the same color as the shell. Additional harness adjustment information is included but may be text only. ☐	No indication of correct slots to use for this mode (for applicable multi-mode CRS) and/or no mention of additional sizing information. ☐	
Vehicle belt & flexible lower anchor path labeling and routing.	Illustrated clearly with no need to read text in order to route seatbelts. Contrasting label is directly next to the corresponding belt path on both sides of CRS. ☐	Belt routing path label is only contrasting on one side but would otherwise fulfill "A" criteria. ☐	Belt routing label not next to corresponding path. Belt routing path is only labeled on one side. Routing requires reading text or is otherwise not obvious from illustration. May also be obscured by seat pad. ☑	☑ Belt routing path is not labeled.
Shows how to prepare and use lower attachments.	Clear illustrations show how to route and attach lower anchors to vehicle for using the CRS in this mode. One or two words per idea are OK for clarification. ☑	Illustrations plus written instructions provided. **Need** to read text to perform entire operation. ☐	Text-heavy instructions only provided or no instructions at all provided. Partial instructions; some steps missing. ☐	
Durability of labels.	Sticky label(s) or other method of technology label not peeling. ☑		Sticky label(s) are already peeling when restraint removed from box. ☐	

NHTSA Ease of Use Rating Form - 2020

Infant Only Restraints, Convertible RF Mode, or 3-in-1 RF Mode

Make & Model _____ Cybex Aton 2 _____ Model # _____ 515103005 _____

Evaluation of Instructions

	A	B	C	Notes
Is the owner's manual easy to find when the CRS is taken out of the box?	Attached to the child restraint in a clearly visible location. ☐		Attached to the child restraint in a hard-to-find location or not attached to the seat at all. ☑	☑ Attached in a hard-to-find place.
Evaluate the storage system for accessing the manual in this mode.	It is obvious and easy to use. The manual can be accessed when the CRS is installed in this mode of use. ☐	It is obvious and easy to use, but the manual cannot be accessed when the CRS is installed in this mode of use. ☐	The designated storage system isn't obvious or it is difficult to use regardless of mode of use. Can easily fall of off carrier if removed. ☑	☑ Manual cannot be accessed in this mode. ☑ Manual storage difficult to find.
Clear indication of child's size range. Is there additional information in the manual about how the child should fit?	Separate, clear, complete height and weight information directly next to the illustration. Additional size information included alongside a picture. ☑	Separate, clear, complete height and weight information directly next to the illustration. Additional size information included as short, simple text. ☐	Incomplete text as indicated, text independent of illustration, or no illustration, and/or no mention of additional sizing information. ☐	
All methods of installing the seat in this mode are clearly indicated, including with lower anchors, lap belt only, and lap/shoulder belt, with and without the base as necessary.	Illustrated clearly with CR in vehicle seat. No need to read text although illustrations should be labeled for each method of installation. ☑		Method missing, partially illustrated, or no illustrations at all. CRS may be shown without a vehicle seat. ☐	
Warning to avoid placing a rear-facing child restraint in front of an active airbag .	Separate from unrelated warnings and illustrated; has its own page or other very clear demarcation. Also remarks that the safest place for all children is in the rear. ☑	Illustrated but buried within other unrelated warnings, for example, in a bulleted list. Must still contain a warning that the safest place for children is in the rear AND specifically mention the dangers of RF CRS and airbags. ☐	Buried among other text, incomplete warning, or no warning at all. ☐	
Instructions for routing both lap belt and lap/shoulder belt for this mode, including details about different vehicle seatbelts and how this CRS should be installed with each of them.	Illustrated clearly. No need to read text in order to route seatbelt; should be obvious from diagrams. Manual includes complete instructions for determining vehicle seatbelt type. ☐	Illustrated clearly. No need to read text in order to route seatbelt; should be obvious from diagrams. Instructions for determining vehicle seatbelt type are present but may be incomplete. ☑	Unclear instructions that require reading text. No mention of how to use vehicle seatbelts correctly. ☐	☑ Seatbelt section is incomplete.
Shows how to prepare and use lower attachments.	Clear illustrations show how to route and attach lower anchors to vehicle for using the CRS in this mode. One or two words per idea are OK for clarification. ☑	Illustrations plus written instructions provided. **Need** to read text to perform entire operation. ☐	Text-heavy instructions only provided or no instructions at all provided. Partial instructions; some step missing. ☐	
For this mode, information in written instructions and on labels match.	Yes. ☑		No. Please describe the conflict under notes. ☐	

Make & Model: Cybex Aton 2   Model #: 515103005

Securing the Child

	A	B	C	Notes
All functional parts (i.e., required for correct use as per instructions) including seat pad or cover attached and ready to use, harness slots and crotch strap in their lowest settings.	Yes. ☑		No, not ready to use regardless of how difficult the assembly may be. May direct user to manual or is otherwise difficult. Tools may be required. Please describe under notes. ☐	
Does the harness clip require threading to secure properly? Is it labeled to indicate its proper positioning on the child?	No, and harness clip is labeled. ☐	No, but harness clip is not labeled. ☑	Yes. ☐	☑ Harness clip is not labeled.
Evaluate the ease of inserting the shoulder portions of the harness buckle for this seat.	Each upper portion of the shoulder harness may be inserted separately. ☑	"Puzzle" buckle with an intermediate method of holding the shoulder portions together. ☐	"Puzzle" buckle with no intermediate method of holding the shoulder portions together ☐	
Access to & use of harness adjustment system.	Can access harness system when installed, one hand to tighten (one pull system). Possible 2 hands to loosen (i.e., one to depress button and one to loosen the harness. ☑		Does not meet "A" criteria. Please describe under notes. ☐	
Evaluate the number and adjustability of the harness slots in the shell and the pad.	The number of slots in the pad & shell match, and there are at least 3 OR the system is adjustable to at least 3 heights. ☑		Does not meet "A" criteria. Please describe under notes. ☐	
Visibility & alignment of harness slots for systems that must be re-threaded.	Can see through all harness slots. All slots in pad are aligned with slots in shell. ☐	Cannot see through all harness slots because they are small or are misaligned with the shell. ☐	Cannot see all harness slots because there is something in way for this mode, e.g. an insert, a head hugger, or body pillow. ☑	☑ Headhugger/body pillow blocks harness slots. ☐ n/a, system does not require re-thread
Ease of adjusting the harness for child's growth.	No need to rethread system. No mandatory pieces exist that may become loose when adjusting system. ☐	No need to rethread system, but may be otherwise difficult to adjust. ☐	Harness must be rethread to adjust. Loose mandatory pieces may be present. Could misroute or incorrectly resecure harness. ☑	☑ Harness must be rethreaded to adjust for height.
Ease of conversion **to** RF from all other possible modes of use.	Simple operation with only a single or dual action. Illustrations and instructions on seat showing mode change. ☐	Simple operation but multiple actions are required. Illustrations may be missing from the label, requiring the user to read the manual. ☐	Operation is difficult, requiring many complicated steps that must be followed in the manual. ☐	☑ n/a, single mode CRS
Ease of re-assembly if pad/cover removed for cleaning.	No loose parts. Easy to remove and reattach the padding. No rethreading required. ☐	Harness system may need to be rethreaded to re-assemble, but no loose parts exist. ☐	Loose parts may exist, including the harness system. Harness system may need to be rethreaded to re-assemble. May even need hand tool(s). ☑	☑ Harness must be rethreaded. ☑ Loose parts are generated.
Ease of adjusting/removing shield.	Clear illustration on CRS, simple action, shield marked. ☐	Need to read text, simple action, shield not marked. ☐	Other tool(s) required. ☐	☑ n/a, no shield ☐ n/a, shield not adjustable

Infant Only Restraints, Convertible RF Mode, or 3-in-1 RF Mode

Make & Model _____ Cybex Aton 2 _____   Model # _____ 515103005 _____

Vehicle Installation Features

	A	B	C	Notes
Ease of routing vehicle belt or LATCH lower attachment straps (if flexible) for installation in this mode, with and without base if separate.	A 95th percentile male hand can route the seatbelt easily and comfortably. The padding does not need to be moved in order to route the belt. ☑		The belt path does not accommodate a 95th percentile male hand, or has to be routed under the CRS padding for one or more modes of RF installation. ☐	
Can vehicle belt or lower LATCH straps (if flexible) interfere with harness (including crotch strap) or be routed incorrectly with respect to other seat elements such as padding?	No contact or interference possible. ☑		Possible contact or misrouting. Please describe this potential under **notes**. ☐	
Ease of attaching/removing infant seat from base.	Simple to attach, difficult to mistakenly secure carrier to base. One step release mechanism easy to reach. ☑		Difficult to attach carrier securely to base. Easy to mistakenly secure carrier to base. Release mechanism may be difficult to reach. Carrier has the potential to appear correctly installed when it is not. ☐	☐ n/a, no separate base
Ease of use of any RF belt positioning feature on CRS such as a lock-off.	Simple to use with instruction on CRS. ☐	Simple to use but must refer to manual. ☑	Multiple steps, confusing to use even with manual. ☐	Lockoff is simple to use, but the user may need to refer to the owner's manual.
Evaluate the seat's angle feedback device and the recline capabilities of the base (if separate). **Convertible, 3-in-1**	Obvious, separate recline device. Adjustable to at least three levels of recline for this mode. ☐	Indication on a label or text in the same color as the CRS shell used as the recline device. Adjustable to at least three levels of recline for this mode. ☐	No feedback device on CRS, or does not have three levels of recline for this mode. ☐	☑ n/a, has separate base
Carrier with separate base	Obvious, separate recline device (may only be on the carrier since it is more critical). Base is adjustable so that it allows for at least three levels of recline for this mode. ☑	Base is adjustable so that it allows for at least three levels of recline for this mode. However, does not meet "A" criteria for separate recline device. ☐	Base does not have three levels of recline for this mode. ☐	☐ n/a, no separate base
Do the lower anchors require twisting to remove from the vehicle?	No, system fully retracts from vehicle anchors with release mechanism. ☐	No twisting required but secondary action required to remove lower anchor from seat bight. ☑	Yes, user must twist lower anchors to remove from vehicle. ☐	☑ Buttons on lower attachments. ☐ n/a, no lower anchors
Evaluate the storage system for the lower anchors when not in use.	Simple, obvious, dedicated, labeled storage system. Or, lower anchors that completely retract when not in use. ☑	Storage system exists but may easily overlooked. ☐	No separate storage system exists, or user is directed to hook lower anchors together when not in use. ☐	☐ n/a, no lower anchors
Is there an indication on the carrier itself indicating where to put the handle when installed in vehicle?	Yes. ☑		No. ☐	☐ n/a, no separate carrier

Evaluation of Labels

	A	B	C	Notes
Clear indication of child's size range for this mode. Is there additional information on the CRS about how the child should fit in it?	Separate, clear, complete height and weight information directly next to the illustration. Additional size information included as a picture. ☑	Separate, clear, complete height and weight information directly next to the illustration. Additional size information included as short, simple text. ☐	Incomplete text as indicated, text independent of illustration, or no illustration, and/or no mention of additional sizing information. ☐	
All methods of installing the seat in this mode are clearly indicated, including with lower anchors, lap belt only, and lap/shoulder belt, with and without the base as necessary.	Illustrated clearly with CR in vehicle seat. **No need** to read text although illustrations should be labeled for each method of installation. ☑		Method missing, partially illustrated, or no illustrations at all. CRS may be shown without any vehicle seat at all. **Must** read text. ☐	
Does the CRS indicate the correct harness slot height for this mode? Is there additional information on the CRS about how the shoulder straps should fit for this mode?	Yes, there is a graphic or contrasting text indicating the correct harness slots to use for this mode. Additional harness adjustment information is conveyed using a picture. ☑	Yes, there is text indicating the correct harness slots to use for this mode but they may be the same color as the shell. Additional harness adjustment information is included but may be text only. ☐	No indication of correct slots to use for this mode (for applicable multi-mode CRS) and/or no mention of additional sizing information. ☐	
Vehicle belt & flexible lower anchor path labeling and routing.	Illustrated clearly with no need to read text in order to route seatbelts. Contrasting label is directly next to the corresponding belt path on both sides of CRS. ☑	Belt routing path label is only contrasting on one side but would otherwise fulfill "A" criteria. ☐	Belt routing label not next to corresponding path. Belt routing path is only labeled on one side. Routing requires reading text or is otherwise not obvious from illustration. May also be obscured by seat pad. ☐	
Shows how to prepare and use lower attachments.	Clear illustrations show how to route and attach lower anchors to vehicle for using the CRS in this mode. One or two words per idea are OK for clarification. ☐	Illustrations plus written instructions provided. **Need** to read text to perform entire operation. ☐	Text-heavy instructions only provided or no instructions at all provided. Partial instructions; some steps missing. ☑	☑ Labels do not explain use of LATCH.
Durability of labels.	Sticky label(s) or other method of technology label not peeling. ☑		Sticky label(s) are already peeling when restraint removed from box. ☐

Infant Only Restraints, Convertible RF Mode, or 3-in-1 RF Mode

Make & Model _____Graco Grows4Me_____   Model # _____2074606_____

Evaluation of Instructions

	A	B	C	Notes
Is the owner's manual easy to find when the CRS is taken out of the box?	Attached to the child restraint in a clearly visible location. ☑		Attached to the child restraint in a hard-to-find location or not attached to the seat at all. ☐	
Evaluate the storage system for accessing the manual in this mode.	It is obvious and easy to use. The manual can be accessed when the CRS is installed in this mode of use. ☑	It is obvious and easy to use, but the manual cannot be accessed when the CRS is installed in this mode of use. ☐	The designated storage system isn't obvious or it is difficult to use regardless of mode of use. Can easily fall of off carrier if removed. ☐	
Clear indication of child's size range. Is there additional information in the manual about how the child should fit?	Separate, clear, complete height and weight information directly next to the illustration. Additional size information included alongside a picture. ☐	Separate, clear, complete height and weight information directly next to the illustration. Additional size information included as short, simple text. ☐	Incomplete text as indicated, text independent of illustration, or no illustration, and/or no mention of additional sizing information. ☑	☑ Add'l size information is in text. ☑ No picture of child in CRS.
All methods of installing the seat in this mode are clearly indicated, including with lower anchors, lap belt only, and lap/shoulder belt, with and without the base as necessary.	Illustrated clearly with CR in vehicle seat. No need to read text although illustrations should be labeled for each method of installation. ☑		Method missing, partially illustrated, or no illustrations at all. CRS may be shown without a vehicle seat. ☐	
Warning to avoid placing a rear-facing child restraint in front of an active airbag .	Separate from unrelated warnings and illustrated; has its own page or other very clear demarcation. Also remarks that the safest place for all children is in the rear. ☑	Illustrated but buried within other unrelated warnings, for example, in a bulleted list. Must still contain a warning that the safest place for children is in the rear AND specifically mention the dangers of RF CRS and airbags. ☐	Buried among other text, incomplete warning, or no warning at all. ☐	
Instructions for routing both lap belt and lap/shoulder belt for this mode, including details about different vehicle seatbelts and how this CRS should be installed with each of them.	Illustrated clearly. No need to read text in order to route seatbelt; should be obvious from diagrams. Manual includes complete instructions for determining vehicle seatbelt type. ☐	Illustrated clearly. No need to read text in order to route seatbelt; should be obvious from diagrams. Instructions for determining vehicle seatbelt type are present but may be incomplete. ☐	Unclear instructions that require reading text. No mention of how to use vehicle seatbelts correctly. ☑	Lap-belt-only directions missing in routing instructions.
Shows how to prepare and use lower attachments.	Clear illustrations show how to route and attach lower anchors to vehicle for using the CRS in this mode. One or two words per idea are OK for clarification. ☑	Illustrations plus written instructions provided. **Need** to read text to perform entire operation. ☐	Text-heavy instructions only provided or no instructions at all provided. Partial instructions; some step missing. ☐	
For this mode, information in written instructions and on labels match.	Yes. ☑		No. Please describe the conflict under notes. ☐	

Make & Model _____Graco Grows4Me_____   Model # _____2074606_____

Securing the Child

	A	B	C	Notes
All functional parts (i.e., required for correct use as per instructions) including seat pad or cover attached and ready to use, harness slots and crotch strap in their lowest settings.	Yes. ☐		No, not ready to use regardless of how difficult the assembly may be. May direct user to manual or is otherwise difficult. Tools may be required. Please describe under notes. ☑	Cupholder must be installed.
Does the harness clip require threading to secure properly? Is it labeled to indicate its proper positioning on the child?	No, and harness clip is labeled. ☑	No, but harness clip is not labeled. ☐	Yes. ☐	
Evaluate the ease of inserting the shoulder portions of the harness buckle for this seat.	Each upper portion of the shoulder harness may be inserted separately. ☑	"Puzzle" buckle with an intermediate method of holding the shoulder portions together. ☐	"Puzzle" buckle with no intermediate method of holding the shoulder portions together ☐	
Access to & use of harness adjustment system.	Can access harness system when installed, one hand to tighten (one pull system). Possible 2 hands to loosen (i.e., one to depress button and one to loosen the harness. ☑		Does not meet "A" criteria. Please describe under notes. ☐	
Evaluate the number and adjustability of the harness slots in the shell and the pad.	The number of slots in the pad & shell match, and there are at least 3 OR the system is adjustable to at least 3 heights. ☑		Does not meet "A" criteria. Please describe under notes. ☐	
Visibility & alignment of harness slots for systems that must be re-threaded.	Can see through all harness slots. All slots in pad are aligned with slots in shell. ☐	Cannot see through all harness slots because they are small or are misaligned with the shell. ☐	Cannot see all harness slots because there is something in way for this mode, e.g. an insert, a head hugger, or body pillow. ☐	☑ n/a, system does not require re-thread
Ease of adjusting the harness for child's growth.	No need to rethread system. No mandatory pieces exist that may become loose when adjusting system. ☑	No need to rethread system, but may be otherwise difficult to adjust. ☐	Harness must be rethread to adjust. Loose mandatory pieces may be present. Could misroute or incorrectly resecure harness. ☐	
Ease of conversion **to** RF from all other possible modes of use.	Simple operation with only a single or dual action. Illustrations and instructions on seat showing mode change. ☐	Simple operation but multiple actions are required. Illustrations may be missing from the label, requiring the user to read the manual. ☐	Operation is difficult, requiring many complicated steps that must be followed in the manual. ☑	☑ No illustrations on the label showing conversion. ☑ Flexible LATCH belt must be rerouted. ☑ n/a, single mode CRS
Ease of re-assembly if pad/cover removed for cleaning.	No loose parts. Easy to remove and reattach the padding. No rethreading required. ☑	Harness system may need to be rethreaded to re-assemble, but no loose parts exist. ☐	Loose parts may exist, including the harness system. Harness system may need to be rethreaded to re-assemble. May even need hand tool(s). ☐	
Ease of adjusting/removing shield.	Clear illustration on CRS, simple action, shield marked. ☐	Need to read text, simple action, shield not marked. ☐	Other tool(s) required. ☐	☑ n/a, no shield ☐ n/a, shield not adjustable

Make & Model _____ Graco Grows4Me _____   Model # _____ 2074606 _____

Vehicle Installation Features

		A	B	C	Notes
Ease of routing vehicle belt or LATCH lower attachment straps (if flexible) for installation in this mode, with and without base if separate.		A 95th percentile male hand can route the seatbelt easily and comfortably. The padding does not need to be moved in order to route the belt. ☐		The belt path does not accommodate a 95th percentile male hand, or has to be routed under the CRS padding for one or more modes of RF installation. ☑	☑ Tight fit for 95th % male hand. ☑ Need to move padding.
Can vehicle belt or lower LATCH straps (if flexible) interfere with harness (including crotch strap) or be routed incorrectly with respect to other seat elements such as padding?		No contact or interference possible. ☐		Possible contact or misrouting. Please describe this potential under **notes**. ☑	☑ Interference is possible.
Ease of attaching/removing infant seat from base.		Simple to attach, difficult to mistakenly secure carrier to base. One step release mechanism easy to reach. ☐		Difficult to attach carrier securely to base. Easy to mistakenly secure carrier to base. Release mechanism may be difficult to reach. Carrier has the potential to appear correctly installed when it is not. ☐	☑ n/a, no separate base
Ease of use of any RF belt positioning feature on CRS such as a lock-off.		Simple to use with instruction on CRS. ☐	Simple to use but must refer to manual. ☐	Multiple steps, confusing to use even with manual. ☐	☑ n/a, no belt positioning feature
Evaluate the seat's angle feedback device and the recline capabilities of the base (if separate).	*Convertible, 3-in-1*	Obvious, separate recline device. Adjustable to at least three levels of recline for this mode. ☑	Indication on a label or text in the same color as the CRS shell used as the recline device. Adjustable to at least three levels of recline for this mode. ☐	No feedback device on CRS, or does not have three levels of recline for this mode. ☐	☐ n/a, has separate base
	Carrier with separate base	Obvious, separate recline device (may only be on the carrier since it is more critical). Base is adjustable so that it allows for at least three levels of recline for this mode. ☐	Base is adjustable so that it allows for at least three levels of recline for this mode. However, does not meet "A" criteria for separate recline device. ☐	Base does not have three levels of recline for this mode. ☐	☑ n/a, no separate base
Do the lower anchors require twisting to remove from the vehicle?		No, system fully retracts from vehicle anchors with release mechanism. ☐	No twisting required but secondary action required to remove lower anchor from seat bight. ☐	Yes, user must twist lower anchors to remove from vehicle. ☑	☑ Attachments require twisting. ☐ n/a, no lower anchors
Evaluate the storage system for the lower anchors when not in use.		Simple, obvious, dedicated, labeled storage system. Or, lower anchors that completely retract when not in use. ☐	Storage system exists but may easily overlooked. ☑	No separate storage system exists, or user is directed to hook lower anchors together when not in use. ☐	Storage location may be difficult to find. ☐ n/a, no lower anchors
Is there an indication on the carrier itself indicating where to put the handle when installed in vehicle?		Yes. ☐		No. ☐	☑ n/a, no separate carrier

Evaluation of Labels

	A	B	C	Notes
Clear indication of child's size range for this mode. Is there additional information on the CRS about how the child should fit in it?	Separate, clear, complete height and weight information directly next to the illustration. Additional size information included as a picture. ☑	Separate, clear, complete height and weight information directly next to the illustration. Additional size information included as short, simple text. ☐	Incomplete text as indicated, text independent of illustration, or no illustration, and/or no mention of additional sizing information. ☐	
All methods of installing the seat in this mode are clearly indicated, including with lower anchors, lap belt only, and lap/shoulder belt.	Illustrated clearly with CRS in vehicle seat. Illustrations should be labeled for each method of installation, must include label on each mode that indicates tether should be used. ☑		Method missing, partially illustrated, or no illustrations at all. CRS may be shown without a vehicle seat. Illustrations may not be completely labeled for each method of installation, for example, may not be labeled indicating that tether should be in use for all FF installations. ☐	
Does the CRS indicate the correct harness slot height for this mode? Is there additional information on the CRS about how the shoulder straps should fit for this mode?	Yes, there is a graphic or contrasting text indicating the correct harness slots to use for this mode. Additional harness adjustment information is conveyed using a picture. ☑	Yes, there is text indicating the correct harness slots to use for this mode but they may be the same color as the shell. Additional harness adjustment information is included but may be text only. ☐	No indication of correct slots to use for this mode (for applicable multi-mode CRS) and/or no mention of additional sizing information. ☐	
Vehicle belt & flexible lower anchor path labeling and routing.	Illustrated clearly with no need to read text in order to route seatbelts. Label is directly next to the corresponding belt path on both sides of CRS. ☑	Belt routing path label is only contrasting on one side but would otherwise fulfill "A" criteria. ☐	Belt routing label not next to corresponding path. Belt routing path is only labeled on one side. Routing requires reading text or is otherwise not obvious from illustration. May also be obscured by seat pad. ☐	
Shows how to prepare and use lower attachments.	Clear illustrations show how to route and attach lower anchors to vehicle for using the CRS in this mode. One or two words per idea are OK for clarification. ☐	Illustrations plus written instructions provided. Need to read text. ☐	Text-heavy instructions only provided or no instructions at all provided. Partial instructions; some step missing. ☑	☑ Labels do not explain use of LATCH.
Shows how to prepare and use the tether.	Clear illustrations show how to route and attach tether to vehicle for using the CRS in this mode. One or two words per idea are OK for clarification. ☐	Illustrations plus written instructions provided. However, need to read text in order to know to complete all steps. ☐	Text-heavy instructions only provided or no instructions at all provided. Partial instructions; some step missing. ☑	☑ No instruction provided on CRS.
Durability of labels.	Sticky label(s) or other method of technology label not peeling. ☐		Sticky label(s) are already peeling when restraint removed from box. ☐	☑ n/a not youngest mode for this CRS

NHTSA Ease of Use Rating Form - 2020
Forward Facing Only, Convertible FF Mode, Combination FF Mode, or 3-in-1 FF Mode

Make & Model _____ Graco Grows4Me _____   Seat # (on tag) _____ 2074606 _____

Evaluation of Instructions

	A	B	C	Notes
Is the owner's manual easy to find when the CRS is taken out of the box?	Attached to the child restraint in a clearly visible location. ☐		Attached to the child restraint in a hard-to-find location or not attached to the seat at all. ☐	☑ n/a not youngest mode for this CRS
Evaluate the storage system for accessing the manual in this mode.	It is easy to use and it is difficult for the manual to fall out. The manual can be accessed when the CRS is installed in this mode of use. ☐	It is easy to use, but the manual cannot be accessed when the CRS is installed in this mode of use. ☑	The designated storage system is difficult to use or cannot be accessed regardless of mode of use. ☐	☑ Manual cannot be accessed.
Clear indication of child's size range. Is there additional information in the instructions about how the child should fit?	Separate, clear, complete height and weight information directly next to the illustration. Additional size information included alongside a picture. ☐	Separate, clear, complete height and weight information directly next to the illustration. Additional size information included as short, simple text. ☐	Incomplete text as indicated, text independent of illustration, or no illustration, and/or no mention of additional sizing information. ☑	☑ No picture of child in seat.
All methods of installing the seat in this mode are clearly indicated, including with lower anchors, lap belt only, and lap/shoulder belt, with reference to using the tether with each one.	Illustrated clearly with CRS in vehicle seat. No need to read text although illustrations should be labeled for each method of installation. ☑		Method missing, partially illustrated, or no illustrations at all. CRS may be shown without a vehicle seat, or tether may not be labeled. ☐	
Indication that the safest place in a vehicle for children is the rear seat.	Separate from unrelated warnings and illustrated; has its own page or other very clear demarcation. ☑	Buried within other warnings, for example, in a bulleted list. ☐	Buried among other text or no warning at all. ☐	
Instructions for routing both lap belt and lap/shoulder belt for this mode, including details about different vehicle seatbelts and how this CRS should be installed with each of them.	Illustrated clearly. No need to read text in order to route seatbelt; should be obvious from diagrams. Manual includes complete instructions for determining vehicle seatbelt type. ☐	Illustrated clearly. No need to read text in order to route seatbelt; should be obvious from diagrams. Instructions for determining vehicle seatbelt type are present but may be incomplete. ☐	Unclear instructions that require reading text. No mention of how to use vehicle seatbelts correctly. ☑	Lap-belt-only routing instructions are not included.
Shows how to prepare and use lower attachments & tether.	Clear illustrations show how to route and attach lower anchors and tether to vehicle for using the CRS in this mode. One or two words per idea are OK for clarification. ☑	Illustrations plus written instructions provided. Need to read text to perform entire operation. ☐	Text-heavy instructions only provided or no instructions at all provided. Partial instructions; some step missing. ☐	
For this mode, information in written instructions and on labels match.	Yes. ☑		No. Please describe the conflict under **notes**. ☐	

Make & Model _____Graco Grows4Me_____   Seat # (on tag) _____2074606_____

Securing the Child

	A	B	C	Notes
All functional parts (i.e., required for correct use as per instructions) including seat pad or cover attached and ready to use, harness slots and crotch strap in their lowest settings. Tether must also come attached to CRS.	Yes. ☐		No, not ready to use regardless of how simple the assembly may be. May direct user to manual or is otherwise difficult. Tools may be required. Please describe under **notes**. ☐	☑ n/a not youngest mode for this CRS
Does the harness clip require threading to secure properly? Is it labeled to indicate its proper positioning on the child?	No, and harness clip is labeled. ☑	No, but harness clip is not labeled. ☐	Yes. ☐	
Evaluate the ease of inserting the shoulder portions of the harness buckle for this seat.	Each upper portion of the shoulder harness may be inserted separately. ☑	"Puzzle" buckle with an intermediate method of holding the shoulder portions together. ☐	"Puzzle" buckle with no intermediate method of holding the shoulder portions together ☐	
Access to & use of harness adjustment system.	Can access harness system when installed, one hand to tighten (one pull system). Possible 2 hands to loosen (i.e., one to depress button and one to loosen the harness. ☑		Cannot reach the adjustment mechanism in this mode when correctly installed and/or other method of harness adjustment such as those that require two hands, re-threading, or removal of CRS from vehicle. ☐	
Evaluate the number and adjustability of the harness slots in the shell and the pad.	The number of slots in the pad & shell match, and there are at least 3 OR the system is adjustable to at least 3 heights. ☑		Does not meet "A" criteria. ☐	
Visibility & alignment of harness slots for systems that must be re-threaded.	Can see through all harness slots. All slots in pad are aligned with slots in shell. ☐	Cannot see through all harness slots because they are small or are misaligned with the shell. ☐	Cannot see all harness slots because there is something in way for this mode, e.g. an insert, a head hugger, or body pillow. ☐	☑ n/a, system does not require re-thread
Ease of adjusting the harness for child's growth.	No need to rethread system. Simple, obvious operation of the harness adjustment system. No mandatory pieces exist that may become loose when adjusting system. ☑	No need to rethread system, but may be otherwise difficult to adjust. ☐	Harness must be rethread to adjust. Loose mandatory pieces may be present. Could misroute or incorrectly resecure harness, even for a no-thread system. ☐	
Ease of conversion **to** FF from all other possible modes of use.	Simple operation with only a single or dual action. Illustrations on seat showing mode change. ☐	Simple operation but multiple actions are required. Illustrations may be missing from the label, requiring the user to read text which must be present on CRS. ☐	Operation is difficult, requiring many complicated steps. The instructions may be confusing, or missing altogether. ☑	☑ No illustrations on the label. ☑ Flexible LATCH belt must be rerouted. ☐ n/a, single mode CRS
Ease of re-assembly if pad/cover removed for cleaning.	No loose parts. Easy to remove and reattach the padding. No rethreading required. ☑	Harness system may need to be rethreaded to re-assemble, but it is a very simple system. No loose parts exist. ☐	Loose parts may exist, including the harness system. Harness system may need to be rethreaded to re-assemble. May even need hand tool(s). ☐	
Ease of adjusting/removing shield.	Clear illustration on CRS, simple action, shield marked. ☐	Need to read text, simple action, shield not marked. ☐	Other tool(s) required. ☐	☑ n/a, no shield ☐ n/a, shield not adjustable

Make & Model _____ Graco Grows4Me _____   Seat # (on tag) _____ 2074606 _____

Vehicle Installation Features

	A	B	C	Notes
Ease of routing vehicle belt or LATCH lower attachment straps (if flexible) for installation in this mode.	A 95th percentile male hand can route the seatbelt easily and comfortably. The padding does NOT need to be moved in order to route the belt. ☑		The belt path does not accommodate a 95th percentile male hand, or has to be routed under (not past, which is OK) the CRS padding for FF installation. ☐	
Can vehicle belt or lower LATCH straps (if flexible) interfere with harness (including crotch strap) if routed correctly?	No contact or interference possible. ☑		Possible contact or misrouting. Please describe this potential under **notes**. ☐	
Ease of use of any FF belt positioning feature on CRS such as a lock-off.	Simple to use with instruction on CRS. ☐	Simple to use but must refer to manual. ☐	Multiple steps, confusing to use even with manual. ☐	☑ n/a, no belt positioning feature
Evaluate the tether on this CRS.	Only one hand required to tighten and release the tether. ☑		Does not meet "A" criteria. ☐	☐ no tether required
Do the lower anchors require twisting to remove from the vehicle?	No, system fully retracts from vehicle anchors with release mechanism. ☐	No twisting required but secondary action required to remove lower anchor from seat bight. ☐	Yes, user must twist lower anchors to remove from vehicle. ☑	☑ Attachments require twisting to remove.
Evaluate the storage system for the lower anchors & tether when not in use.	Simple, obvious, dedicated, labeled storage system. Or, lower anchors or a tether that completely retracts when not in use. ☑	Storage system exists but may be easily overlooked. ☐	No separate storage mentioned or user is directed to hook lower anchors together or with tether when not in use. ☐

Evaluation of Labels

	A	B	C	Notes
Clear indication of child's size range for this mode. Is there additional information on the CRS about how the child should fit in it?	Separate, clear, complete height and weight information directly next to the illustration. Additional size information included as a picture. ☑	Separate, clear, complete height and weight information directly next to the illustration. Additional size information included as short, simple text. ☐	Incomplete text as indicated, text independent of illustration, or no illustration, and/or no mention of additional sizing information. ☐	
All method(s) of installing this CRS correctly are indicated (high back and/or low back).	Illustrated clearly with CR in vehicle seat. No need to read text although illustrations should be labeled for each method of installation. ☑		No illustrations at all or a method of installation is missing, or may be difficult to tell one method of installation from another. ☐	
Vehicle belt use & vehicle belt path labeling.	Illustrated clearly with no need to read text in order to route seatbelts. Label is directly next to the corresponding belt path or positioning device on both sides of CRS. ☐	Belt routing path label is only contrasting on one side but would otherwise fulfill "A" criteria. ☐	Belt routing label not next to corresponding path. Belt routing path or device is only labeled on one side. Routing requires reading text or is otherwise not obvious from illustration. May also be obscured by seat pad. ☑	☑ Belt routing path is not labeled.
Label warning against using a lap belt only.	Illustration included warning user against using the CRS with the lap belt only for this mode. ☑	Text warning the user not to use the lap belt only in this mode. ☐	No written or illustrated warning. ☐	☐ n/a, may be used with lap belt
Durability of labels.	Sticky label(s) or other method of technology label not peeling. ☐		Sticky label(s) are already peeling when restraint removed from box. ☐	☑ n/a not youngest mode for this CRS

Booster, Combination Seat in BPB Mode, or 3-in-1 in BPB Mode

Make & Model _____ Graco Grows4Me _____   Model # _____ 2074606 _____

Evaluation of Instructions

	A	B	C	Notes
Is the owner's manual easy to find when the CRS is taken out of the box?	Attached to the child restraint in a clearly visible location. Finding it in a very obvious storage system is acceptable. ☐		Attached to the child restraint in a hard-to-find location or not attached to the seat at all. This includes when it is found in an obscured storage system. ☐	☑ n/a not youngest mode for this CRS
Evaluate the storage system for accessing the manual in this mode.	It is obvious and easy to use. The manual can be accessed when the CRS is installed in this mode of use. ☐	It is obvious and easy to use, but the manual cannot be accessed when the CRS is installed in this mode of use. ☑	The designated storage system isn't obvious or it is difficult to use regardless of mode of use. ☐	☑ Manual cannot be accessed.
Clear indication of child's size range. Is there additional information somewhere in the manual about how the child should fit?	Separate, clear, complete height and weight information directly next to the illustration. Additional size information included alongside a picture. ☑	Separate, clear, complete height and weight information directly next to the illustration. Additional size information included as short, simple text. ☐	Incomplete text as indicated, text independent of illustration, or no illustration, and/or no mention of additional sizing information. ☐	
All methods of installing this seat with a lap/shoulder belt including low back and high back modes if they exist.	Illustrated clearly with CR in vehicle seat. No need to read text although illustrations should be labeled for each method of installation. ☑		No illustration, text only. May be illustrated, but not all modes shown (e.g. tether not shown). ☐	
Indication that the safest place in a vehicle for children is the rear seat.	Separate from unrelated warnings and illustrated; has its own page or other very clear demarcation. ☑	Buried within other warnings, for example, in a bulleted list. ☐	Buried among other text or no warning at all. ☐	
Instructions for routing lap/shoulder belt alongside a picture warning against using a lap belt only.	Illustrated clearly with CR on vehicle seat. No need to read text in order to route seatbelt. Diagram warning against using a lap belt only is included in this section of the manual unless seat may be used correctly with one. ☑	Illustrated, outlined, but may not be pictured on a vehicle seat. Text warning not to use with a lap belt (only if it is a misuse) included in this section of the manual. ☐	Unclear instructions that require reading text. Fails to caution against the use of lap-belt only in this section of the manual (if this is a misuse). If the warning is listed somewhere else in the manual, assign a "C". ☐	
For this mode, information in written instructions and on labels match.	Yes. ☑		No. Please describe the conflict under **notes**. ☐	

NHTSA Ease of Use Rating Form - 2020
Booster, Combination Seat in BPB Mode, or 3-in-1 in BPB Mode

Make & Model   Graco Grows4Me   Model #   2074606

Securing the Child

	A	B	C	Notes
All functional parts (i.e., required for correct use as per instructions) including seat pad or cover attached and ready to use, harness slots and crotch strap in their lowest settings.	Yes. ☐		No, not ready to use regardless of how difficult the assembly may be. May direct user to manual or is otherwise difficult. Tools may be required. Please describe under notes. ☐	☑ n/a not youngest mode for this CRS
Ease of conversion from any other mode of use **to** a booster.	Simple operation with only a single or dual action. Illustrations on seat showing mode change. ☐	Simple operation but multiple actions are required. Illustrations may be missing from the label, requiring the user to read text which must be present on CRS. ☐	Operation is difficult, requiring many complicated steps. The instructions may be confusing, or missing altogether. ☑	☑ No illustrations on the label. Flexible LATCH belt must be rerouted if converting from RF mode. ☐ n/a, booster only
Ease of conversion **from** high back **to** low back booster.	Simple action. Illustration provided on seat showing mode change. ☐	Simple action but no specific illustration is provided on seat. Text may be present. ☑	Action difficult or need additional instructions not found on CRS labels. Tools may be required. ☐	☑ No illustrations on the label. ☐ n/a, combination or 3-in-1 ☐ n/a, booster may not be converted
Ease of re-assembly if pad/cover removed for cleaning.	No loose parts. Easy to remove and reattach the padding. ☑		Loose parts. May even need hand tool(s). ☐	

Vehicle Installation Features

	A	B	C	Notes
Ease of use of any separate shoulder belt positioning or guide hardware on CRS.	Very simple action requiring one hand to use. ☑	Two hands to use but action is simple. ☐	Multiple steps to position belt, most likely need to read instructions for clarification. ☐	☐ n/a, no separate device
Does belt-positioning guide or device allow slack to occur? Does it also prevent the shoulder portion from slipping accidentally?	No. The shoulder belt can move freely through its positioning device. In addition, the shoulder belt cannot slip out of the device accidentally. ☑	No. The shoulder belt can move freely through its positioning device. However, the shoulder belt could slip out of the device accidentally. ☐	Yes. The shoulder belt movement is restricted by the belt-positioning device. ☐	☐ n/a, no separate device

Evaluation of Labels

	A	B	C	Notes
Clear indication of child's size range for this mode. Is there additional information on the CRS about how the child should fit in it?	Separate, clear, complete height and weight information directly next to the illustration. Additional size information included as a picture. ☑	Separate, clear, complete height and weight information directly next to the illustration. Additional size information included as short, simple text. ☐	Incomplete text as indicated, text independent of illustration, or no illustration, and/or no mention of additional sizing information. ☐	
All methods of installing the seat in this mode are clearly indicated, including with lower anchors, lap belt only, and lap/shoulder belt.	Illustrated clearly with CRS in vehicle seat. Illustrations should be labeled for each method of installation, must include label on each mode that indicates tether should be used. ☑	(shaded)	Method missing, partially illustrated, or no illustrations at all. CRS may be shown without a vehicle seat. Illustrations may not be completely labeled for each method of installation, for example, may not be labeled indicating that tether should be in use for all FF installations. ☐	
Does the CRS indicate the correct harness slot height for this mode? Is there additional information on the CRS about how the shoulder straps should fit for this mode?	Yes, there is a graphic or contrasting text indicating the correct harness slots to use for this mode. Additional harness adjustment information is conveyed using a picture. ☑	Yes, there is text indicating the correct harness slots to use for this mode but they may be the same color as the shell. Additional harness adjustment information is included but may be text only. ☐	No indication of correct slots to use for this mode (for applicable multi-mode CRS) and/or no mention of additional sizing information. ☐	
Vehicle belt & flexible lower anchor path labeling and routing.	Illustrated clearly with no need to read text in order to route seatbelts. Label is directly next to the corresponding belt path on both sides of CRS. ☑	Belt routing path label is only contrasting on one side but would otherwise fulfill "A" criteria. ☐	Belt routing label not next to corresponding path. Belt routing path is only labeled on one side. Routing requires reading text or is otherwise not obvious from illustration. May also be obscured by seat pad. ☐	
Shows how to prepare and use lower attachments.	Clear illustrations show how to route and attach lower anchors to vehicle for using the CRS in this mode. One or two words per idea are OK for clarification. ☐	Illustrations plus written instructions provided. Need to read text. ☐	Text-heavy instructions only provided or no instructions at all provided. Partial instructions; some step missing. ☑	☑ Labels do not explain use of LATCH.
Shows how to prepare and use the tether.	Clear illustrations show how to route and attach tether to vehicle for using the CRS in this mode. One or two words per idea are OK for clarification. ☐	Illustrations plus written instructions provided. However, need to read text in order to know to complete all steps. ☐	Text-heavy instructions only provided or no instructions at all provided. Partial instructions; some step missing. ☑	☑ Must read text to use tether.
Durability of labels.	Sticky label(s) or other method of technology label not peeling. ☑	(shaded)	Sticky label(s) are already peeling when restraint removed from box. ☐	☐ n/a not youngest mode for this CRS

Evaluation of Instructions

	A	B	C	Notes
Is the owner's manual easy to find when the CRS is taken out of the box?	Attached to the child restraint in a clearly visible location. ☑		Attached to the child restraint in a hard-to-find location or not attached to the seat at all. ☐	☐ n/a not youngest mode for this CRS
Evaluate the storage system for accessing the manual in this mode.	It is easy to use and it is difficult for the manual to fall out. The manual can be accessed when the CRS is installed in this mode of use. ☐	It is easy to use, but the manual cannot be accessed when the CRS is installed in this mode of use. ☑	The designated storage system is difficult to use or cannot be accessed regardless of mode of use. ☐	☑ Manual cannot be accessed.
Clear indication of child's size range. Is there additional information in the instructions about how the child should fit?	Separate, clear, complete height and weight information directly next to the illustration. Additional size information included alongside a picture. ☐	Separate, clear, complete height and weight information directly next to the illustration. Additional size information included as short, simple text. ☐	Incomplete text as indicated, text independent of illustration, or no illustration, and/or no mention of additional sizing information. ☑	☑ No picture of child in seat.
All methods of installing the seat in this mode are clearly indicated, including with lower anchors, lap belt only, and lap/shoulder belt, with reference to using the tether with each one.	Illustrated clearly with CRS in vehicle seat. No need to read text although illustrations should be labeled for each method of installation. ☑		Method missing, partially illustrated, or no illustrations at all. CRS may be shown without a vehicle seat, or tether may not be labeled. ☐	
Indication that the safest place in a vehicle for children is the rear seat.	Separate from unrelated warnings and illustrated; has its own page or other very clear demarcation. ☑	Buried within other warnings, for example, in a bulleted list. ☐	Buried among other text or no warning at all. ☐	
Instructions for routing both lap belt and lap/shoulder belt for this mode, including details about different vehicle seatbelts and how this CRS should be installed with each of them.	Illustrated clearly. No need to read text in order to route seatbelt; should be obvious from diagrams. Manual includes complete instructions for determining vehicle seatbelt type. ☑	Illustrated clearly. No need to read text in order to route seatbelt; should be obvious from diagrams. Instructions for determining vehicle seatbelt type are present but may be incomplete. ☐	Unclear instructions that require reading text. No mention of how to use vehicle seatbelts correctly. ☐	
Shows how to prepare and use lower attachments & tether.	Clear illustrations show how to route and attach lower anchors and tether to vehicle for using the CRS in this mode. One or two words per idea are OK for clarification. ☑	Illustrations plus written instructions provided. Need to read text to perform entire operation. ☐	Text-heavy instructions only provided or no instructions at all provided. Partial instructions; some step missing. ☐	
For this mode, information in written instructions and on labels match.	Yes. ☑		No. Please describe the conflict under **notes**. ☐	

Make & Model ___WAYB Pico___   Seat # (on tag) ___CSTPI-ER-002___

Securing the Child

	A	B	C	Notes
All functional parts (i.e., required for correct use as per instructions) including seat pad or cover attached and ready to use, harness slots and crotch strap in their lowest settings. Tether must also come attached to CRS.	Yes. ☑		No, not ready to use regardless of how simple the assembly may be. May direct user to manual or is otherwise difficult. Tools may be required. Please describe under **notes**. ☐	☐ n/a not youngest mode for this CRS
Does the harness clip require threading to secure properly? Is it labeled to indicate its proper positioning on the child?	No, and harness clip is labeled. ☑	No, but harness clip is not labeled. ☐	Yes. ☐	
Evaluate the ease of inserting the shoulder portions of the harness buckle for this seat.	Each upper portion of the shoulder harness may be inserted separately. ☑	"Puzzle" buckle with an intermediate method of holding the shoulder portions together. ☐	"Puzzle" buckle with no intermediate method of holding the shoulder portions together ☐	
Access to & use of harness adjustment system.	Can access harness system when installed, one hand to tighten (one pull system). Possible 2 hands to loosen (i.e., one to depress button and one to loosen the harness. ☑		Cannot reach the adjustment mechanism in this mode when correctly installed and/or other method of harness adjustment such as those that require two hands, re-threading, or removal of CRS from vehicle.	
Evaluate the number and adjustability of the harness slots in the shell and the pad.	The number of slots in the pad & shell match, and there are at least 3 OR the system is adjustable to at least 3 heights. ☐		Does not meet "A" criteria. ☑	☑ Less than three harness positions for use in this mode.
Visibility & alignment of harness slots for systems that must be re-threaded.	Can see through all harness slots. All slots in pad are aligned with slots in shell. ☐	Cannot see through all harness slots because they are small or are misaligned with the shell. ☐	Cannot see all harness slots because there is something in way for this mode, e.g. an insert, a head hugger, or body pillow. ☐	☑ n/a, system does not require re-thread
Ease of adjusting the harness for child's growth.	No need to rethread system. Simple, obvious operation of the harness adjustment system. No mandatory pieces exist that may become loose when adjusting system. ☐	No need to rethread system, but may be otherwise difficult to adjust. ☐	Harness must be rethread to adjust. Loose mandatory pieces may be present. Could misroute or incorrectly resecure harness, even for a no-thread system. ☐	☐ N/A, no adjustment.
Ease of conversion **to** FF from all other possible modes of use.	Simple operation with only a single or dual action. Illustrations on seat showing mode change. ☐	Simple operation but multiple actions are required. Illustrations may be missing from the label, requiring the user to read text which must be present on CRS. ☐	Operation is difficult, requiring many complicated steps. The instructions may be confusing, or missing altogether. ☐	☑ n/a, single mode CRS
Ease of re-assembly if pad/cover removed for cleaning.	No loose parts. Easy to remove and reattach the padding. No rethreading required. ☑	Harness system may need to be rethreaded to re-assemble, but it is a very simple system. No loose parts exist. ☐	Loose parts may exist, including the harness system. Harness system may need to be rethreaded to re-assemble. May even need hand tool(s). ☐	
Ease of adjusting/removing shield.	Clear illustration on CRS, simple action, shield marked. ☐	Need to read text, simple action, shield not marked. ☐	Other tool(s) required. ☐	☑ n/a, no shield ☐ n/a, shield not adjustable

Vehicle Installation Features

	A	B	C	Notes
Ease of routing vehicle belt or LATCH lower attachment straps (if flexible) for installation in this mode.	A 95th percentile male hand can route the seatbelt easily and comfortably. The padding does NOT need to be moved in order to route the belt. ☑		The belt path does not accommodate a 95th percentile male hand, or has to be routed under (not past, which is OK) the CRS padding for FF installation. ☐	
Can vehicle belt or lower LATCH straps (if flexible) interfere with harness (including crotch strap) if routed correctly?	No contact or interference possible. ☑		Possible contact or misrouting. Please describe this potential under **notes**. ☐	
Ease of use of any FF belt positioning feature on CRS such as a lock-off.	Simple to use with instruction on CRS. ☐	Simple to use but must refer to manual. ☐	Multiple steps, confusing to use even with manual. ☐	☑ n/a, no belt positioning feature
Evaluate the tether on this CRS.	Only one hand required to tighten and release the tether. ☑		Does not meet "A" criteria. ☐	☐ no tether required
Do the lower anchors require twisting to remove from the vehicle?	No, system fully retracts from vehicle anchors with release mechanism. ☐	No twisting required but secondary action required to remove lower anchor from seat bight. ☑	Yes, user must twist lower anchors to remove from vehicle. ☐	☑ Push-button connectors.
Evaluate the storage system for the lower anchors & tether when not in use.	Simple, obvious, dedicated, labeled storage system. Or, lower anchors or a tether that completely retracts when not in use. ☑	Storage system exists but may be easily overlooked. ☐	No separate storage mentioned or user is directed to hook lower anchors together or with tether when not in use. ☐
