

- Angela Zabransky, Melrose Park, IL 60160 I want everyone to be able to breathe clean air, unpolluted by emissions from all the gas-powered cars, trucks, and buses on the roads. In order to provide electricity for vehicles, we need to provide charging stations.
- Kate Crowley, Willow River, MN 55795 I want my children and grandchildren to be able to breathe cleaner, healthier air.
- Judith Kenney, Chicago, IL 60653 I want my grandchildren to have a livable planet.
- Adele Murphy, San Antonio, TX 78209 I want my grandchildren to live in a safe healthy world. For this to be true we must join together to reduce the pollutants we spew into the air. Eco friendly cars matter!
- Jo Forkish, Eugene, OR 97405 I want my grandchildren and their children and grandchildren to have a future!
- Sherrie Murphy, Warrington, PA 18976 I want my granddaughters to be able to breathe clean air.
- Clark Peter, Bend, OR 97702 I want my great great great grandchildren to live in a safe and healthy environment! I drive a hybrid and that's helping but it's still not enough!!
- Russell Tonelli, Wausau, WI 54401 I want my kids and grandkids to have a safe and clean environment.
- Cynthia Clemments, Brandon, FL 33510 I want our children to be healthier now and in the future. Cleaner cars and public transportation is a big step in making this happen. In addition it will reverse the damage we have already done to the planet and give humanity and all life a better chance for survival.
- Gretchen Smith, Hoover, AL 35244 I want the air to be cleaner for everyone!!?
- Katelyn Cahill, Apex, NC 27523 I want there to be a clean habitable world for my 7 month old daughter to grow up in. We are already seeing the devastating effects of climate change and it will continue to get worse without drastic action.
- Evita Cortez, Dallas, TX 75226 I want to a healthy environment for my kids to grow up in
- Sheila Out, Ithaca, NY 14850 I want to be able to afford an electric car as my next vehicle, so I don't have to feel guilty every time I drive. Stronger standards will make hybrids and plug-ins more competitive.
- Anne Ehmann, Merrick, NY 11566 I want to be able to breathe clean air and reduce pollution.
- Michele Warner, Otis, OR 97368 I want to be able to breathe.
- Henry Ickes, Blairstown, NJ 7825 I want to breathe clean air - I think I should be allowed to, no matter what some company thinks. It's past time to change the way the transportation plays fast and loose with the environment.
- Maria Pedak-Kari, Gaithersburg, MD 20882 I want to breathe clean air and be able to see the world around me. Dirty, fume-filled air prevents that. I do not want the rest of my years, of which I hope there are at least twenty, spent with lung and breathing illness. I see the air polution everytime I hike. We can do much, much better if we pull in a strong pro-environment direction. But it takes all of us and you have an important role.
- David Ferguson, Mill Valley, CA 94941 I want to breathe clean air and reduce my asthma hardship.
- Felicito Guerrero Jr., Paige, TX 78659 I want to buy a cleaner car. I want to drive a cleaner car. I think federal regulations to promote cleaner more efficient cars is right to save our planet. The planet is in grave danger and we need to go all out to save it!
- Dianne Maughan, Grand Lake Stream, ME 4668 I want to buy an electric car but need lower prices. Increased demand should do that.
- Wendy Sjoblom, Duluth, MN 55806 I want to do my part to reduce carbon emissions. Public transport to work is not an option for me and many people in my community.
- Alison Mcginty, Trinidad, CO 81082 I want to make sure my children, nieces and nephews have a viable world to live in, with clean air, and where nature thrives.
- Joan Balfour, Boynton Beach, FL 33437 I want to save our planet for my grandchildren and future generations.
- Celia O'Kelley, Tuscaloosa, AL 35401 I want us to go to electric cars/trucks as quickly as possible. I do know this may mean I have to get ride of my car that will run for a long time, but it is necessary for economics. Climate change is already costing everyone big bucks. The fix is less than this and it will bring jobs.
- Kelsey McDonald, Minneapolis, MN 55415 I was diagnosed with asthma a few years ago while living in an urban neighborhood busy with motor vehicle traffic. Even though I am typically a pedestrian and rarely

a driver, I suffer walking through these environments polluted by gas-powered engines. It is time to drive down pollution due to combustion engines in order to improve the air quality and the health of us all.

- Dana L Beck, Tulsa, OK 74132 I was hopeful before President Biden's election, and I voted for him, of course. But now, I don't think anyone in the government is listening to us when it comes to the environment...because of Joe Manchin and Krysten Sinema... so I don't really know what good it does to vote any longer.
- Ann Miller, Duluth, MN 55812 I was in Italy two years ago, and I noticed only one pickup truck; most drivers used small, economy cars. I felt embarrassed for Americans' reliance on huge, gas-guzzling vehicles. We need to be a leader in the movement to promote fuel-efficient vehicles.
- Kevin Oldham, Ballston Spa, NY 12020 I wish I could afford an electric vehicle.
- Saurabh Bansal, Westlake, OH 44145 I work as a Nephrologist, a Kidney Doctor, and there have been multiple studies in the past few years showing harm to the kidneys from air pollution. That is in addition to damage to other organs such as the lung and heart and increased rates of cancer. Please make our vehicles more safe, efficient and clean to improve the health of our fellow citizens!
- Alaina Norzagaray, Cary, NC 27513 I work at a drive thru location. One of my concerns is how much damage I am doing to myself by inhaling the toxic fumes of all the cars (especially the older ones). I don't want to live in fear while on the job due to citizens' cars.
- Jean Burrige, Champaign, IL 61821 I work for Champaign's park district. Our "green islands" are awash in exhaust fumes. If even the greenest spaces have diminished air quality, imagine what the rest is like. For the sake of everyone who breathes, please address this problem.
- Roberta Paro, Norwich, CT 6360 I would like to breathe clean air, not fair air. And, I would like the same for everyone else. Please move forward with setting fuel economy standards that will improve the quality of the air we breathe, by reducing vehicle emissions. .
- Vincent Karamanov, Kirkwood, MO 63122 I would like to enjoy cleaner air in my community, which is why it is important to me to significantly lower vehicle emissions.
- Rebecca Kosbab, Burnsville, MN 55306 I want to breathe without pushing an O2 tank
- Corinne Brown, Springfield, OR 97477 I'm tired of waiting for the Middle East to grow up and act more like the typical rest of the world. If we can try to cut our oil dependency that would be great.
- Abigail McNear, Evanston, IL 60202 I'm worried about whether our country will meet its climate goals.
- Denise Sprague, Wall Township, NJ 7719 If cars in Europe can get over 70mpg, and have clean emissions, why is the best mpg in the US only half or less?
- Seana Parker-Dalton, Shrewsbury, MA 1545 If Congress fails to provide a solution to transform our energy grid, we MUST do everything possible to tackle emissions in every other possible way. I am begging you to do the right thing! This is the time to act boldly!
- Kathy Martinez, Greenwood Village, CO 80121 If we do not address the consequences of using oil to drive everything, our world will die. Humans are smart. Now is the time for significant change.
- John Marro, Chicago, IL 60638 If we don't protect our wildlife and environment now it's going to be too late.
- Sally Caskey, Winter Haven, FL 33881 If we don't work on cleaning up this whole world now, soon it won't matter. We won't have a livable world. DO IT NOW!
- Murray Smart, Beardsley, MN 56211 If we don't address the Climate Crisis NOTHING else will matter. ALL life on earth will DIE period! ACT! ACT NOW!
- Kenneth Harris, Hugo, MN 55038 If we don't demand more efficient, less polluting, vehicles NOW, when would be a good time to start? One hopes not when most of us have trouble breathing and climate change is irretrievable. Too late then, like asking for a Covid vaccination when one is in the ICU with a ventilator.
- James Maguire, Boulder, CO 80302 If we don't stop pumping carbon, methane, and other greenhouse gases into the air, weather disasters will become more frequent, intense, and destructive. Please use your power to stop the pollution.
- Keith Rhinehart, Santa Clara, CA 95050 If we have the technology to make cars cleaner then we should use it.
- Katherine Selting, Mount Vernon, WA 98273 If we take action now, we can prevent the worst impacts of climate change. Without this, we can't!

- Chris Reed, Pittsboro, NC 27312 If we want our climate to survive, for our children to have a clean planet, we need to use ALL of the tools at our disposal! That includes tightening up the standards and using more efficient vehicles that pollute LESS.
- Eric Cornetta, Hingham, MA 2043 If you make money polluting, pay taxes for cleaning it up. Too long a free ride for corporations making teeny, tiny MPG improvements. BIG CHANGE time, more electric options & giant MPG improvements.
- Christopher Wiscavage, Bellingham, WA 98229 If you make the rule, the industry will follow
- Todd Milazzo, Seattle, WA 98126 I'm more scared than ever about the survival of our ecosystems
- Chad Upshaw, Olympia, WA 98502 I'm tired of seeing these massive personal vehicles suck resources out of nature, destroying it and wildlife at the same time. All for corporate, private greed.
- Jo-Anne Harris, Columbus, OH 43202 I'm trying to do my bit, driving a hybrid. We all collectively need to more though! Climate change is contributing to increasing disruption with severe weather events, and we need strong action.
- Clyde Howard, Auburn, NY 13021 I'm worried about climate change and the serious negative impact on our environment of the unrestrained extraction, transportation and use of fossil fuels.
- B Lykes, Columbus, OH 43220 Important.
- Michael Freeman, Harleysville, PA 19438 In 2005, I purchased my first hybrid car. I have only had hybrids or EVs since then. I also have a battery powered lawn mower, snow blower, chain saw, leaf blower, and trimmer. I realize the extra cost for an EV or hybrid is not for everyone but have done what I could to help the environment. Please do what you can to provide the regulations so that everyone has access to clean and efficient vehicles.
- Desean Freeman, Pike Road, AL 36064 In addition to the environmental impact, the economic benefits that will most assuredly come from investing in cleaner energy autos will create employment opportunities and careers lasting for generations.
- Emily Pfeiffer-Russell, Bakersfield, CA 93312 In Bakersfield we have some of the worst air pollution in the country and a lot of it is from all the trucks that come here to transport food. We must have cleaner vehicles, especially trucks!!
- Linda Fielder, Carrollton, TX 75006 In order to have a lasting future we need to clean up our air. One important way is with cleaner vehicles.
- Win Southworth, Black Mountain, NC 28711 In order to secure a healthier future for us all, we must be bold in setting high fuel standards. It is imperative that this is accomplished ASAP.
- Keith Thompson, Saint Paul, MN 55106 In the early '70s the Datsun B210 was getting over 40 mpg. How many cars today do that? Why are we focused on saving resources and giving people more affordable transportation? Because of fossil fuel lobbying! And the planet burns because of that!
- Thomas Fifarek, Vancouver, WA 98664 In the long term gas prices will be lower.
- Charles Robinson, Piedmont, CA 94611 In the US it is easy to hop in a car and go anywhere. It provides a great sense of freedom, and for many personal mobility is an economic necessity. It also is a leading cause of pollution and climate change. As an individual, the negative impacts are minuscule, and it is difficult to feel personally responsible. That is why we must act collectively to minimize the impact of vehicles on the environment.
- Peter Adams, Pittsburgh, PA 15215 Increased fuel efficiency and stronger emissions standards are an effective two pronged approach to reduce reliance on fossil fuels while also improving the air quality and health of our communities.
- Barbara Winner, Arnold, MD 21012 Individuals in communities closest to highways and city streets are those most likely to suffer from respiratory illnesses caused by the pollution from vehicles. This is discrimination toward lower income neighborhoods and an assault on our environment. Moving toward clean energy vehicles and power plants helps to preserve our planet for future generations. We are all called upon to be stewards of our Earth. Please give us a boost toward a clean future by closing loopholes that allow automakers to continue to produce gas-guzzling vehicles.
- Samuel H. Clarke, Corvallis, OR 97330 Industry has the capacity to clean up vehicular transport by an order of magnitude. Lets demand that they do so expeditiously. Replace gasoline with batteries and charging stations, and do it quickly.

- Paula Morgan, Winter Springs, FL 32708 Industry loopholes cost the citizens of America precious time needed to improve the air quality in our country. Trump was disgraceful in dropping all emissions standards we had made with respect to vehicles and exhaust. We must handle pollution as Climate Change is here and everyday matters. As we move toward electric vehicles we need to lessen exhaust pollution by having cleaner cars, trucks and buses with no harm coming from any loopholes the industry wants desperately to take advantage of to improve their bottom line which killing out planet Earth! The time to improve is now!
- Billy Angus, Hamilton, MT 59840 Invest in electric vehicles and outlaw fossil fuel!!
- William Gleason, Harrisburg, PA 17110 Invest in the fossil fuel-free future we need, not the carbon intensive mistakes of the past.
- Lory Slade, Rockledge, FL 32955 Is cleaner cars ever going to take over the roadways in my lifetime!?
- Rachel Katz, Berkeley, CA 94703 It is critical that we set fuel economy standards that dramatically reduce vehicle emissions, protect public health, and improve gas mileage. I urge you to do so--for the sake of our planet and our children's children.
- Cynthia Strout, Hollis Center, ME 4042 it is imperative that all possible measures be taken to limit carbon emissions. The strongest standards for vehicles need to be written and implemented for the sake of our planet.
- Brandon Wheelock, Vista, CA 92081 It is imperative that we start pushing for strict standards for automobile emissions. This alone accounts for a good portion of the carbon pollution that is devastating the earth and leading to an accelerated climate change.
- Janet Carpenter, University Park, MD 20782 It is imperative that you protect people and our precious environment by requiring cleaner, more efficient vehicles!
- Ronni Robles, Tucson, AZ 85743 It is important for the government to promote tighter standards that will limit the dangers of emissions of all vehicles that contribute to the looming climate crisis.
- Janet Nodorft, Verona, WI 53593 It is important to me that we have clean air for all to breathe and be healthy. Please make all vehicles adhere to rigorous standards in Alternative 3 to keep everyone safe and to save our planet.
- bradley smith, Farmers Branch, TX 75234 It is long past time to end our reliance on fossil fuels. Please rapidly increase CAFE standards while incentivising electric vehicles.
- Marilee Meyer, Port Angeles, WA 98362 It is long past time to make a real effort to clean up our environment and protect the health and well-being of this and future generations.
- John Campbell, Jupiter, FL 33469 It is my understanding that the transportation sector accounts for the largest contribution to carbon based emissions besides power generation. The transportation sector is low hanging fruit that we can no longer ignore.
- JUDITH DETLOFF, Lakebay, WA 98349 It is obvious. Pollution from cars, as well as methane, and the global polluters in industry, and other; so many contributors to the environmental disaster that is warming up the planet and polluting our skies, waters, earth and life in general has got to change. The move to electric is helpful in many ways though it is realized that the production of batteries even pollutes. We must start somewhere, and quickly to save our planet for ALL LIFE. I support the move to more efficient and less pollutive ideas that have passed their time by far for the reversal of what we have created since the industrial revolution. Not just cars and trucks and coal and fracking but any way to save what we have left which is diminishing every day. Do something for us all and begin with the cleaning up of the vehicles that are responsible for much of this. This is a no brainer. We have to do everything we can and this is just a start!
- Duane Lazzell, Bruceton Mills, WV 26525 It is possible to increase fuel economy and therefore reduce emissions. This must be done to save our planet,
- Anne Mosser, Weaverville, NC 28787 It is really important that we do everything we can to reduce air pollution, for ourselves and our children.
- Craig Collins, Winston Salem, NC 27127 It is the government's job to protect Americans, yet time and again, the government fails to do so. This must stop. Loopholes must be closed in rules/laws which allow corrupt, greedy corporations to circumvent the law and endanger the health of Americans. Further, these emissions greatly contribute to greenhouse gases and Climate Change. If we do not take dramatic stops now, life may cease to exist in 50 years. Not only are gas-and diesel-powered cars and trucks polluting

our air, and contributing greatly to Climate Change, but they are dangerous in collisions, and since gas prices are controlled by OPEC and commodities traders, they cost Americans much more than they should. I urge you to adopt Alternative 3 to protect Americans and help reduce the effects of Climate Change. Thank you for your consideration.

- Chrisann Goossen, Zelienople, PA 16063 It is time for our cars to be cleaner. Fuel-efficient cars are good for people (who wants to pay more at the pump?) and good for the planet.
- Sebastiaan De Voogd, Woodbridge, NJ 7095 It is time for this country to lead again. Leading in development in technology and creating a clean enjoyment for its citizens is a great opportunity.
- Jhan Lees, Homosassa, FL 34446 It is time for this. If we care about our children and grandchildren and beyond we need this NOW!
- Emily Boone, Louisville, KY 40206 it is time to eliminate fine particulate air pollution to decrease death from lung disease.
- Lucie Burke, Marblehead, MA 1945 It is time to make a positive impact on the environment through change and leadership. Global warming is of great concern to everyone in the scientific community as well as the rest of humanity. This is such an easy fix compared to the harder longer term changes we need to make. There is no excuse not to go forward with higher limits and less loopholes regarding gas efficiency.
- Darrell House, Wilkinson, IN 46186 It is time to stop the polluting cars and for once consider the human species instead of Greedy Corporate Interest !
- Claire Dolney, Eagan, MN 55123 It is time to take strong action and ensure accountability to those who are exacerbating the issue. The risks of dirty car/fuel standards will come at a severe cost to our health, environment and future. As someone who is concerned about the future and all the great disasters we look almost certain to face, it is imperative we take steps to mitigate at least some of the most harmful. Please take action & lead our world to a better, just future.
- David McCullough, Little Rock, AR 72207 It is way past time to do something important to slow global warming and this is one way. To miss the opportunity would be criminal.
- Susan Safford, Tallahassee, FL 32301 It is way past time to invest in the future for the sake of the generations that follow us. It is way past time to close up loopholes and other perks for those who pollute our environment.
- Edward Thornton, Swarthmore, PA 19081 It is well known that transition to more Green, less oil will help both jobs and profits. Nothing wrong with that.
- Arlene Corona, La Crosse, WI 54601 It matters because, as a great grandmother, it is the duty of adults to leave a livable planet for those who come after us.
- James Graham, Glenview, IL 60026 It matters to alleviate my asthma and for the future of the planet my grandchildren will inherit!! What we do now will have an affect for hundreds of years!
- Thomas Monroe, Pompano Beach, FL 33064 IT MATTERS!!!
- Jenny Henson, Dixon, IL 61021 It may already be too late but I believe that nature can heal the wounds we have inflicted on it with time. We need to act now!
- Omar Siddique, Ellicott City, MD 21043 It should matter to all of us.
- Ellen Banks, Williamsville, NY 14221 It's important for the health of our planet long term and our health now
- Myra Fedyniak, Albany, NY 12210 It's insane that my 1998 got better mileage than my 2010! It's also insane that trucks get as low as 7 MPG!!! WTF???
- Jim Atkins, Winston Salem, NC 27104 It's obvious to all but the most irresponsible person that cleaner transportation is needed in this country. What is your excuse?
- William Davis, Dayton, OH 45414 It's simple, really. No Planet, No Home. The U.S. must be a leader in combating global warming. We must push auto makers to hit new highs in efficiency. It's for our grandchildren and beyond.
- Gay Hall, Corvallis, OR 97333 It's time to act, now!
- Tracey Sickler, Tallahassee, FL 32312 It's time to change now before it's too late. We shouldn't be using any fossil fuels.
- Susan Krawczyk, Princeton Junction, NJ 8550 It's time. We cannot afford to wait any longer.

- Denise Di Santo, Snoqualmie, WA 98065 It's very critical we take bold action now to alleviate and prevent unhealthy air conditions. The health effects of airborne toxins will be exacerbated with increasing temperatures throughout the US and the world. We must do what we can now to ensure we don't continue with more of the same. Please take action so that current and future generations are not bearing the effects of this long lasting problem. We need solutions now.,
- Frona Vicksell, Concord, MA 1742 It's an important way to fight climate warming.
- Kathleen Repole, Redding, CT 6896 It's disturbing every time I drive by a gas station and see the extremely high prices!
- Thomas Williams, Boston, MA 2116 It's inevitable that this will happen. It's important that it happens now. We're already way behind and we need action now.
- Penny Whitmer, Glen Burnie, MD 21060 It's not just the traffic we deal with it's also the dirty air. We need clean, fuel efficient vehicles now! I wish I could afford an electric vehicle.
- Rrsca, Lee, MA 1238 It's not too late to fight climate change
- John Schumann, Portland, OR 97212 It's past time to get this done. Please get on it.
- Kristina Heiks, Boone, NC 28607 Its past time to save the planet. It's a beautiful earth. Let's take care of it
- Nick Hammer, Dubois, PA 15801 It's probably already too late. At least make an attempt to recognize the problem.
- Kelly Doolittle, Locke, NY 13092 It's really very simple. Important science tells us that we need to divest our lives of fossil fuels in the biggest way possible, as quickly as possible or our planet will become uninhabitable for many animals, including humans. Of course there are other pollutants and policies that contribute, but fossil fuels are one of the main problems. Let's get our heads out of the sand. We cannot afford to ignore the issue of how the burning of fossil fuels is ruining our health, our homes, and the very future of humanity. Please do the right thing. By regulating gas guzzlers we can help to avoid the worst effects of climate change. The least you can do is legislate for cleaner, more fuel efficient vehicles.
- Bonnie Desaulnier, Eugene, OR 97405 It's time to embrace the twenty first century. Infrastructure needed along with affordable EV's.
- Margaret G Tyler, Ph.D., Saint Louis, MO 63122 It's time to make the switch to cleaner vehicles. Our plant, our very existence as a species, depends on it.
- William Wilson, Shady Side, MD 20764 It's way beyond time to act more responsibly, especially with the types of vehicles we're putting on the road. Frankly, I think the entire auto industry is acting with blatant irresponsibility with the continuing production of gas guzzling vehicles, including SUVs and increasingly larger pickup trucks now advertised as luxury vehicles. I'm tired of seeing people riding around a big cab trucks; grocery shopping and visiting the mall. As if there is no crisis of excess carbon in the air.
- Roman Kiselev, Memphis, TN 38111 I've always been worried about climate change. Transition to electric transport accompanied by the switch to renewable resources in power production is a critical milestone on our way to a better future. An electric car owner myself, I can't stress enough how much more I enjoy it than a gas-powered one. Thank you!
- Sharon Moore, West Nyack, NY 10994 I've been hearing about the damage greenhouse gases do to our planet ince the 1960's, and it amazes me that only now is our government taking steps to prevent it. We must all cooperate with President Biden's plans to keep our Earth habitable!
- Kathy Swan, Ellicott City, MD 21043 I've been wanting to purchase a new electric cargo van for some time now, but I'm waiting for one to be built and sold in the U.S.! I don't drive all that often but if people whose jobs require them to drive all day could switch to electric vehicles as well, I can imagine the positive results: fewer Code Orange air quality days in my area, fewer respiratory illnesses, reduced greenhouse gas emissions, saving money on fuel and maintenance costs. Please consider the larger picture for our future rather than the short term costs to the automotive industry.
- Dave Kisor, Pahoa, HI 96778 I've inhaled more than my share of jet exhaust on both flight lines and flight decks and would rather not see or smell what I'm breathing. While in Riverside, CA, during the summer you knew the mountains were only 20 miles away, but for most of the time they vanished and when the winds came back, as if by magic, they reappeared! The local chambers of commerce called it the Inland Empire, but I called it the Empire of Smog. One of my duties in our USFS fire research unit was to go to federal property and collect fuel samples (vegetation) to burn, from an elevation of 4,000 feet you couldn't see through the heavy crud layer that blanketed the entire valley. You didn't want to go back into it, but

unfortunately we had no choice. I've been annoying congress to switch to hemp and other non food crops to produce volatile oils for fuels. I specify non food crops so poorer countries wouldn't starve because their food crops went for fuel.

- Barbara Mathes, Rio Rico, AZ 85648 Keep our climate, animals and people safe!
- Angela Carpenter, New Smyrna Beach, FL 32169 Legislation is the only way forward toward cleaner cars.
- Mark Mckennon, Brooklyn, NY 11215 Let the NHTSA finally, officially, and permanently, adopt and enforce viable fuel economy standards for all vehicles. At first, no administration was willing to buck the powerful auto industry and require greater investment in engines that would get far better gas mileage -- even though the technology had already been demonstrated. Then, during the Obama administration, mileage standards were raised and air pollution was measurably reduced. Then, the Trump team reversed those requirements. Now, the see-saw continues. This is ABSURD. Car drivers need a permanent break from the market manipulations of car makers and gas merchants; less gas bought and used translates to healthier air, and bank accounts, and people. WHAT EXACTLY, OTHER THAN THE PROFITS OF FOSSIL FUELERS AND THE POLITICAL PRESSURE THEY APPLY IN THE FORM OF DONATIONS AND LOBBYISTS, IS THE PROBLEM??? THE TECHNOLOGY ITSELF IS ALREADY AVAILABLE. DO SOMETHING!
- Lida Skrzypczak, Washington, DC 20009 Let us breathe!
- Jane Markley, Festus, MO 63028 Let's all work together to save the planet for future generations.
- Russ Gamber, Arlington, TX 76012 Let's do this for the sake of our children and grandchildren.
- Kimberly Keslin, Forest Park, IL 60130 Let's make the earth a better place for ourselves and future generations!
- B Hornsby, Thonotosassa, FL 33592 Let's embrace the future with clean air and clean water. The future can be today!!!!
- David Silveyra, Commerce, CA 90040 Let's get serious about climate change. Cleaner, more efficient vehicles means a healthier planet and happier/healthier living organisms. To secure this, we must put the planet and all the life it supports first.
- Joan Gugerty, Baldwin, MD 21013 Let's get serious about serving the People. Climate change is a crisis that demands immediate action. Do all in your power to get away from fossil fuels.
- Christina Ohlogge, Norfolk, VA 23505 Let's just simply want to save the planet. If not under government pressure little humans won't do enough. Reach high (top of the command chain) go low (on emissions). Thanks
- Sarah Donovan, Easton, CT 6612 Let's try to make all cars clean and quiet electric vehicles. In addition, no one should idle an internal combustion engine starting now!
- Kimberly Field, Port Saint Lucie, FL 34952 Let's urge The National Highway Traffic Safety Administration (NHTSA) to set stringent fuel economy standards so residents across the country can drive the cleanest, safest, and most fuel-efficient cars.
- Keith Crudgington, Fairfield, CT 6825 Life matters. Trump is as intelligent as pond scum. He did everything to bring the world closer to ruin.
- Kathy Falconer, Visalia, CA 93277 Living in the Central Valley of California, the COVID requirement that business staff work from home and education was to be online left very few moving cars on the city streets. Within a couple months the skies were blue and one could see the snow capped mountains to the east. Highway 99 runs though the center of California with heavy duty trucks transporting goods up and down the state emitting gases into the atmosphere with air being blocked between two mountain ranges. Visalia students have a rate of asthma higher than the state average. Each winter my husband has experienced respiratory infections that have twice placed him in the hospital. Requiring non emitting fuels for all heavy, medium and light weight trucks would be a God send to the health of our children and community. Please help to make this happen
- Edward and Gail Laurson, Denver, CO 80235 LONG OVERDUE!
- Ann Smith, Washington Boro, PA 17582 Look at the NASA picture , April 2019, 2020, 2021 over Manhattan. The lack of gas vehicles, cleaned up the very air we need to breathe, to live. If something doesn't get done Now, there won't be a lot of tomorrow. Think about it!
- Raymond Howard, Geneva, NY 14456 Make the move to making and selling only Electric powered vehicles by 2030. The UK is!

- Peter Sigmann, Port Orange, FL 32127 make the mpg standard severe but allow inclusion of e-cars in calculation. My family is extremely pleased with our electric VW
- Alfred Wolf, Kihei, HI 96753 Make the world cleaner
- David Lax, Fort Collins, CO 80521 Make them affordable for all!
- Bonnie Johnoff, Phoenix, AZ 85041 Many of my family members have allergies, asthma and other breathing issues which are effected negatively by poor quality air. We must improve the air we breathe in order to survive as humans.
- Linda Gaska, Sugar Grove, IL 60554 Many people that I know would buy EV cars tomorrow if they were ensured that there would be enough infrastructure in place to do so. Placing EV charging stations in existing gas stations would allow a transitional period to phase fossil fuels out and give gas station owners the ability to transition and keep their stations profitable. The location of such stations would mean having charging available at useful locales and adjacent to highways.
- Ashley Bull, Dallas, TX 75214 Millions upon millions of people die each year from air pollution. Our climate is unstable and nature's intricate and interconnected web of life is under dire stress. We must make bold change.
- Nivo Rovedo, Lagrangeville, NY 12540 More efficient vehicles are needed to help avert the worst effects of the climate catastrophe that we are in. It will help keep people healthier with cleaner air.
- Alison Kliem, Lorton, VA 22079 More efficient vehicles means less gas station visits which means more money in other parts of the economy. Also more efficient and cleaner vehicles means 1 step closer to meeting climate goals that we are so far behind on.
- Robert Kline, Asheville, NC 28803 More efficient vehicles of all kinds on our highways will substantially reduce greenhouse gas contamination of our atmosphere. As a physician for over 40 years, I witnessed the terrible widespread impact of poor air quality on the cardiopulmonary function of so many of my patients. This resulted in clear erosion of quality of life as well as accelerated progression of disease, delayed recovery from infections and clearly premature death.
- Jonathan Baker, Lincoln, NE 68502 More efficient vehicles should have been the norm by now. We are late to the table and should instantly place strict rules in place on emissions and demand much more efficient vehicles.
- Brian Kabcenell, Greenwich, CT 6831 More fuel efficient cars are cheaper for the people driving them and better for everyone on our ever warming planet. There aren't any good reasons not to greatly increase efficiency standards and close all the loopholes.
- Richard Gibson, New Plymouth, ID 83655 More fuel efficient cars will keep my town cleaner.
- Felix Mbuga, Palo Alto, CA 94304 Most of us will not leave any grand legacy when we're gone but at the very least, we have a moral duty to NOT leave the planet worse than we found it for future generations.
- Terry Hess, Silver Spring, MD 20906 Moving away from fossil fueled vehicles is vital to the health of our country and our world!
- Chuck Summers, Overland Park, KS 66210 My children and grandchildren deserve better air than we will leave at the current rate of clean air enforcement. Stop polluting the air as if someone can fix it later. We need to fix it now.
- Kristin Meuser, Las Vegas, NV 89141 My children are deciding whether to have children or not based solely on climate change and what their children will face by the turn of the century. It's devastating to think about. Please please do whatever you can to halt this.
- Amy Hladik, Denver, CO 80238 My children have to breathe this air too. Denver had the worst air quality I've seen in years and it was not all due to wildfires.
- Scofield Leslie, Redlands, CA 92373 My children live in one of the worst polluted areas of this country. I worry for their safety and health and I'm seeing more and more warehouses with Diesel engines as well as flights into airports nearby coming into our town. It's only worsening. Help us protect our children and our earth.
- Robert Richey, Austin, TX 78736 My children, grandchildren, friends, everyone else, and all living things deserve a healthy environment in which to live.
- Sari Fordham, Riverside, CA 92506 My daughter breaths some of the most polluted air in the country. It's time we end industry loopholes.

- Virginia Stone-Meyer, Columbia, MO 65203 My daughters and grandchildren all have asthma. Pollution affects their healthy, and many others.
- Peter Poulos, Montgomery, OH 45242 My EV gets 140 MPGE and avoids putting into the atmosphere about 600 lbs of CO2 per month. Sonos Motors has developed a EV with solar panel skin that recharges the battery by simply being parking in the light of day. Why are you denying the obvious--that EVs are cleaner and more efficient. The markets and the environment indicate that it's game over for fossil fuels.
- Andrew HoulikRitchey, Houston, TX 77092 My family and many of the students I teach suffer from asthma partly caused by and very much exacerbated by car air pollution. We have the technologies in hand to stop this hard to my family and my community. The time has passed when we should allow auto makers and car buyers to slide by with polluting. Please enforce all avenues to make this world safer for my friends and family!
- Joanne Corey, Vestal, NY 13850 My family has a Chevy Bolt EV and a plug-in hybrid Chrysler Pacifica, which runs on battery most of the time. It's important to us to not be adding to air and climate pollution. We need this kind of transportation to be available more widely, though, to have the kind of impact we need to tamp down greenhouse gases. There has already been so much global warming that we must move quickly now to cut greenhouse gas emissions. Please do everything you can to support zero/low emission vehicles and retire those that burn fuels.
- Gail Kihn, Holley, NY 14470 My family, with 3 cars (one for each adult), limits our use, mileage, and combines trips. We live in a rural area, yet when in suburbs, used public transportation as much as possible. Make public transportation as clean energy as possible, to minimize greenhouse gases and help save our Earth from being unfit for life!
- Douglas Mendenhall, Alton, IL 62002 My grand daughter's future depends upon your work. She's 10 weeks old. Please do what you know is right. Thank you.
- Joyce Mast, Champaign, IL 61821 My grandchildren and their grandchildren must have a world where they can breathe. That means less pollution, and more efficient vehicles.
- Julia Richter, Saint Louis, MO 63146 My grandchildren deserve a healthy planet so they can thrive!! There is no substitute for Earth!!
- William Looney, Silverdale, WA 98383 My grandkids and yours!
- Virginia Connett, Wrightsville Beach, NC 28480 My grandsons get excited when they "don't hear or smell" an engine whether it be a car, lawn mower or leaf blower. In their childish innocence they accept that these are signs of progress toward cleaner air. How can we hold adults accountable to the same goal? We have the technology; we just need to let go of our old ways. Then our grandchildren won't have to smell, see or hear about our polluting toys!
- Reynold and Ann Frutkin, Indianapolis, IN 46240 My great grandchildren to be.
- Kim Hunt, Vista, CA 92084 My home has become surrounded by roads and all of the surfaces both inside and outside our house are continually coated in black particles they even plug our nostrils. We are tired of living this way. Why would you not want cleaner, more efficient vehicles? And that is a small thing in light of climate change. We need your help!
- Jeff Day, Kensington, MD 20895 My house of 30 years has in the last five years been hit by 3 furious downpours that sent storm water into my home. We'd spent \$10,000 on storm water control before
- Linda Good, Langley, WA 98260 My husband & I are concerned, especially for our grandchildren.
- Jaqueline Newlove, Tucson, AZ 85745 My husband and I both have lung problems. Clean air is essential to our ongoing health. I urge you to support Alternative 3. Car makers need incentives to increase fuel economy, not loopholes. Clean air saves lives.
- Dawn Casper, Madison, WI 53705 My husband and I have two wonderful daughters, now more than ever I fear for their health and safety as they grow up and start to have families of their own. I am a commercial real estate developer and have recently completed a LEED certified building for one of my tenants. I have also just completed installing solar panels on another building I own. We need to change the way we do things now!! I'm trying to do my part, but I am also counting on my government to step up and shift to a healthier more sustainable track NOW! Our current crisis is giving us a choice - do we try to get back to ?normal? or choose a better path. Please act NOW to set fuel economy standards that keep future generations health and well being in mind. Our kids are counting on us to make the right choices today so they even have a future tomorrow.

- shyama orum, New York, NY 10001 My husband and I plan to buy an electric pickup truck in 2022 because we know that gas and diesel trucks contribute to climate disaster. Please support people who want to make the right choice for our future instead of giving loopholes to industry that allow more use of fossil fuels.
- Donna Moot, Wooster, OH 44691 My husband suffers from asthma and needs clean air.
- Gerald Kealey, Iowa City, IA 52245 My kids need clean air
- John Atwood, Chicago, IL 60626 My Mom died of emphysema and never smoked!
- Sylvain Beloin, North Granby, CT 6060 My mother (a non-smoker) is dying of lung cancer. Pollution is a contributing factor to the disease that is killing her. Please do everything possible to eliminate fossil fuel pollution.
- Dana Berthold Hendricks, Stevenson, WA 98648 My nine-year-old son asked me why our country didn't make stringent rules to improve gas mileage a long time ago, since we've had the technology to do so since the 70s. There is no acceptable answer. It's embarrassing and heartbreaking. There's no excuse for gas guzzlers, and it's long past time to stop making exceptions!
- Ann Duck, Wilmette, IL 60091 My planet, its air and its water deserve all the protection we can give it
- Susan Lee, Tampa, FL 33604 My sister lives in Montana. Every summer for years now, she's been hit by the smoke coming from the fires in California. The period of time she has to stay almost exclusively inside just because of the horrible air quality from smoke is getting longer and longer. The fires are Climate Crisis produced from greenhouse gases. My nephew lives in Brooklyn, NY. His area was affected by the floods produced by Ida coming up from the Gulf. A hurricane in Brooklyn! This is Climate Crisis! I live in Tampa, FL. Our streets flood much faster from even a steady rain because the seas are rising, and the water has nowhere to go! What are we supposed to do? If we deal with the environmental Climate Crisis, we will ALL be better off. I have a fully electric car, solar panels, recycled glass counter tops, porch furniture made of polywood--recycled milk cartons, and I recycle everything I can. I do everything I can to help THE COMMON GOOD. Now it's up to YOU.
- Nancy Boxer, Havertown, PA 19083 My son and granddaughter have asthma. This only gets worse when the air quality declines, and so I worry for them.
- Melany Deem, Willoughby, OH 44094 My son has asthma, my father died from copd, and clean air to breathe is a basic necessity.
- Krista Hammer, Bellevue, WA 98005 My son went to college in LA. I was shocked to see the air pollution there. I will never buy another gas guzzler car. We need the strictest rules.
- Tim Bardell, Saint Louis Park, MN 55416 My wife and I live about two blocks downwind from a 6 lane highway and a mile south of a major freeway. We want to breathe cleaner air. There is also a high school and three day cares on either side of the highway. Those children should also be breathing cleaner air.
- Jeffrey Holzem, Jefferson City, MO 65101 My wife and I walk along city streets every day and smell the exhaust fumes. It not only smells bad, it is harmful to our health. There is no reason for allowing this pollution to continue. Please make sure all vehicles meet strict clean air standards. Transportation is one of the biggest sources for carbon emissions which cause climate change. We cannot afford to continue our current pattern and meet the President's emission reduction.
- Mathews Hollinshead, St. Paul, MN 55116 My wife and I went electric last March and the performance gain is amazing. The U.S. could easily meet drastically increased fuel efficiency standards if EVs and charging stations were to replace most ICE junkers and gas pumps by, say, 2035. We need drastic increases in fleet fuel efficiency standards NOW to support the switch, in addition to the reasons stated in this petition.
- Terry Robb, Raymore, MO 64083 Need to stop pollution now not 20 years from now. Also pollution control defeat devices need to be banned from auto part stores
- Joseph Wiesner, Milwaukee, WI 53212 Needing clean air seems enough reason in itself, but since we're also burning the planet down, any mitigation we can do would seem to be a good idea.
- Kent Minault, Knoxville, TN 37917 NHTSA must continue the relentless movement to drive down transportation emissions. Emissions from transportation are vastly higher than emissions from residential and commercial uses. Alternative 3 will give us the best spur to innovation and ultimately to the transformation of our mobility to zero emission.

- Ana Lois-Borzi, Saint Paul, MN 55102 NHTSA: Set fuel economy standards that dramatically reduce vehicle emissions, protect public health, and improve gas mileage. And please remove the loopholes that would allow automakers to double down on gas-guzzlers.
- Michael Gates, Akron, OH 44303 NHTSA: NOW its time to make changes for Cleaner Running Auto's for the USA!...+Show the World this change is a MUST TO DO!..Mother Earth Is Calling to STOP the air pollution that CAR'S +++ are causing. Please take Action! to promote ELECTRIC CAR'S, a Change that's a MUST DO!... Thank you, Mike Gates Akron, OH.
- Nadine Ancel, Durango, CO 81301 No amount of potential profits is worth any harm to the environment.
- Kathleen McQuaid, Raleigh, NC 27605 No creature can live healthfully in dirty air and water. Coal or gas power plants, and gas powered vehicles are 2 of the biggest polluters. Let's switch to non-polluting forms of power and electric powered vehicles- for everyone's health!
- K. A. Lemon, Denver, CO 80222 No loopholes to abuse because they will be abused, capitalism can't help itself. We've lost so much time because of the fake science from the oil and gas industry and the collusion of the auto industry that we can't afford to not go as extreme as possible if we're going to save our planet.
- dc katten, Cave Creek, AZ 85331 NO MORE EXCUSES.....NOW! NOW! NOW!
- Vesa Kaakkuriniemi, Holtsville, NY 11742 No more polluter loopholes in clean cars!
- Robert Peters, Estes Park, CO 80517 NO ONE WANTS TO SMELL EXHAST FUMES.
- Daniel Dawley, Cygnet, OH 43413 not being involved or a leader in this area will eventually put us behind or leave us out of upcoming innovation and manufacturing strength
- Elizabeth Ann Garner, Colorado Springs, CO 80908 Not only do we need stricter fuel standards to mitigate pollution and climate change we need to move to electric vehicles and charging stations.
- Gisela Zechmeister, Boise, ID 83706 nothing is more important than air for human life.
- Ronald Hunt, Mobile, AL 36607 Nothing is more sacrosanct than breathing fresh air. Regardless of the affects of CO2 emissions on climate, many Americans exercise in urban areas near vehicular traffic. We need fresher air to breathe so we can stay healthy enough to be resilient as climate-affected disasters become more severe. Please consider requiring automakers to improve fuel standards and lower environmental emissions. Those of that walk, jog, and exercise near major thoroughfares will breathe a whole lot easier.
- Robin Kramer, Olympia, WA 98506 Nothing matters if we don't take action against climate change. Cleaner, more efficient vehicles is part of that action.
- Laura Sychowski, Batavia, IL 60510 Now is the time to make this happen. Please move forward to do what you can to save us and our planet.
- Pamela Gray, Port Townsend, WA 98368 Obviously enacting and enforcing emissions laws is critical at this time of climate crisis. This is no time to mess around playing with car manufacturers and oil conglomerate lobbyists. Too much is at stake. No loopholes. Period. I only wish you had the authority to reduce registration fees on low/no emission vehicles and create more incentives to people to stop driving gas hogs.
- Nancy Crumpacker, Portland, OR 97210 oil and gas must stay in the ground if we are going to protect human lungs and hearts, Thank you for your attention,
- Paulette Lane, Tampa, FL 33609 On a Drive across Florida (Vero Beach to Tampa October (2021), I got behind an old, slow, rickety truck on a single lane road (Highway 60) puffing black smoke from two tall pipes. It was a terrible experience because we could not pass. We were breathing in the smoke! We could not understand why this type of vehicle was still driving on our roads, polluting the air for all of us and contributing to all of our recent climate problems in the US-hot temperatures, parched lands and lakes, fires, floods, violent hurricanes and tornados!
- Aurea Cintra, Penfield, NY 14616 One of the largest sectors that is responsible for CO2 emissions is the transportation sector. There is so much opportunity to drastically reduce these emissions with better policy. Please, re-imagine the current policies so that more effective policy can step in to mitigate the lasting effects from these CO2 emissions that seep through all these loopholes in policies.
- Susan Boyd-Ridyad, Dingmans Ferry, PA 18328 One of the positive things of the pandemic was less cars on the road last spring and early summer as people worked from home. This allowed a respite from pollution and we need to find a way to continue to reduce auto emissions and auto travel.

- Bruce Burns, San Diego, CA 92108 Only when the Last tree has been cut down, the last fish been caught, and the last stream poisoned, will we realize we cannot eat money. It is an all-hands-on deck moment. We must stop the destruction of the only planet in our solar system that can support human life. There is no Planet "B". Act now before it is too late. We could be on the eve of destruction, if we don't act now.
- Logan Swiecki-Taylor, San Diego, CA 92104 Only when the last tree has been cut down, the last fish been caught, and the last stream poisoned, will we realize we cannot eat money. Profits mean nothing if our planet is inhabitable due to human caused climate change.
- Anne Spatola, San Rafael, CA 94901 Our air is getting more polluted daily. Natural disasters like wildfires impact it greatly but we cannot control directly. However we can do something about improving the air we breathe by requiring more autos transition toward electric or hybrid. Many health issues can be attributed to filthy air. I have owned a hybrid car for over 3 years and I feel I am doing what I can. I also purchased solar panels. These additional costs have not easy financially but I feel it is necessary. Can you do your share to help the environment?
- Judith Stetson, Falmouth, MA 2543 Our Cape Cod air is still relatively clean compared to the poisoned air in cities and around superhighways. Nevertheless, the fallout of fossil fuel pollutants that rains down into the oceans is causing disastrous sea level rise which does directly affect Cape Cod. Our marshes are dying, our coastline is eroding, hurricanes are more destructive and more frequent. Ocean acidification makes it harder for shellfish to make shells. Plastics sicken the whole food chain.
- Cynthia Flaherty, Columbus, OH 43221 Our children's and grandchildren's future is at risk. We must drastically reduce CO2 emissions as soon as possible.
- Neal Madnick, Flushing, NY 11358 Our childrens' future depends upon us acting now.
- Wayne Olson, Broken Arrow, OK 74012 Our effort to clean up the environment must start with a really strong push now. Our environment is crumbling and we can't wait any longer!
- Melissa Johnson, Crowley, TX 76036 Our environment deserves the best effort we can make to protect it, and requiring the auto industry to create cleaner and more efficient vehicles with no industry loopholes is imperative to this effort. These requirements can also create new jobs and stimulate our economy, as well as protecting the health and well-being of our people by reducing pollutants in our air. As a voting citizen, this is very important to me and millions of other people. Protect our communities and protect our planet!
- Marie Rawlings, Chelmsford, MA 1824 Our environment needs clean vehicles
- Stuart Knappmiller, St Paul, MN 55106 Our first car was a wedding present from my parents in 1971, a '62 Rambler Ambassador. We drove a 2001 Prius till it died. Now a 2014. Next will be an EV. I'd rather use transit, and do for trips downtown for meetings. But when I look at transit around the cities, we can get there as quickly on our bikes. I've testified for MN Clean Cars, walk to shop, bike, have solar on our roof and insulated in the Carter administration. More importantly, our 12 year old granddaughter tells me she's worried about her future due to Climate Change. She's an optimistic "teen." The 9-year-old is focused on in person school, track, soccer and friends. They and our seventh generation need you to protect them now. When our Community Council Transportation committee requested a diet on the "Maryland 500," (per the folks who worked on it) 4 lane, the book said its VMT was too high. Our County Engineer said fewer crashes and lower injuries were why he went ahead after the test with the 4-3 road diet.
- Nancy Ruth Krauch, St Petersburg, FL 33701 Our fragile planet is dying. It started with depletion of the Ozone Layer in the 60s 70s from chloroflourocarbans from aerosols. The catalytic converters produce sulpherdioxides. The meat packing industry is 1/3 of total greenhouse gas emissions. In the 50s an electric car was built, but fossil fuels were more important. Now Global Warming/Climate Change is real? Is here N now? we need EVs. USPS should go green. Stop factory emissions. We need ALL VEHICLES, SEMI TRACTOR/TRAILERS TOO. I JUST PRAY WE SURVIVE TO 2035. 2028 IS TOO FAR AWAY? Please try for 2025? Amazon N Prime are electric, UPS is getting there, Fed-Ex also needs to go green?? WE NEED TO WORK GLOBALLY TO GO GREEN? NOW? Not in the future. If something isn't done now? The Earth will be like Mars??????????????? SAVE OUR PLANET??????????????
- Edward Landler, Los Angeles, CA 90065 Our future on this earth depends on protecting our environment from the harm we have caused for too long.

- Karen Nelson, Big Stone Gap, VA 24219 Our generation has let down the future generations. We need to step forward with bold plans to correct as many of the problems in the environment that we can. It's time to step up and admit our mistakes and move forward to save our planet. The more the US does the more the rest of the world will follow. Lead by example. Save our planet now, close the loopholes NOW!!
- Lori Kershner, Selinsgrove, PA 17870 Our health and environment depend on structural changes in the way that we consume fossil fuels? cleaner and more efficient vehicles can only help.
- Mary Martin, Saint Charles, MO 63303 Our health and the well-being of our environment are too important to ignore.
- Josiana Bianchi, Little Silver, NJ 7739 Our lives and the lives of future generations depend on clean energy. I never imagined I'd be living in a real apocalyptic world. Polluted air, water & land threaten to kill not only wildlife & nature but humans. If action isn't taken now it's horrifying to think of what environmental disasters my 13 year old daughter will have to combat in 30-50 years.
- Liz Baker, Mentone, AL 35984 Our lungs, our lives, and the future of the planet is at stake!
- Charles Houy, Tucson, AZ 85750 Our nation's health is essential and a worthy investment. Raise the bar on all transportation vehicles, No Exceptions!! Option 3 and Better. How else can we save our species??
- Beverley Rannow, Holland, MI 49423 Our planet can't wait to reduce carbon emissions! We need to have the strongest rules in place to cut our carbon emissions.
- Martha Goldin, San Francisco, CA 94118 Our planet is being destroyed and transportation using fossil fuels is a leading cause. We must do better and the NHTSA has the ability to lead in this effort. Enact regulations that are absolutely tight, so my children, grandchildren and great grandchildren can live in a clean air environment.
- Diana Ward, Saint Petersburg, FL 33713 Our planet is slowly dying. Please do what is right.
- Helen Hand, Wayne, NJ 7470 our planet needs cleaner emission cars & trucks
- Rebecca Sawyer, Portland, ME 4103 Our planet's climate is in a seriously dangerous state, with major contributions from the emissions from fossil fueled vehicles. I and every person on earth have the right to breathe clean air and the auto industries around the world are preventing us from this necessity and right. America, with its massive amount of fossil fueled vehicles is positioned to help remedy this injustice. I IMPLORE YOU to take immediate action by using Alternative 3 when finalizing the fuel economy standards for American made vehicles. YOU have the power to take a MAJOR step for reducing climate pollution for us and our future generations. Please take it!
- Sarah Nurnberger, Minneapolis, MN 55408 Our urban neighborhood is near highways. We need to protect the air for the benefit of us all, most especially our littlest ones with developing lungs and bodies. We can have cleaner energy and more responsible vehicle usage. People before profits.
- Robin Welsh, Fort Collins, CO 80526 Ozone levels in Colorado, where I live continue to be too high. Cleaner vehicles would help alleviate the problem. I have to breathe, so this matters to me!
- Pete Sandifer, Montgomery, AL 36109 Pass the BBB Bill and GET ON WITH IT!!
- Liz Koch, Lawrence, KS 66044 Past time for cleaner cars!!
- Kim Fowler, Santa Fe, NM 87505 People are dying from air pollution. I have asthma and am impacted by it. There is no reason not to improve air quality, which is of benefit to everyone, other than shoring up the terror of lesser wealth and power held by a tiny segment of the population.
- Henry Henderson, Trenton, IL 62293 Personally, I have asthma and the impact helps so many people like me.
- Len Hunt, Stone Mountain, GA 30087 Personally, I look forward to highways run on electricity!
- Michael Marek, Phoenix, AZ 85044 Phoenix rates 7th worst air quality in the US. Clearly need to do better. Time is long overdue.
- Jane Whitney, Brooklin, ME 4616 PLANET EARTH matters to me. Cleaner cars with no loopholes matter to our planet.
- Victoria Rosenstreich, Larchmont, NY 10538 Please ! The future of our country and our planet are at stake!
- Maureen Biscardi, Woburn, MA 1801 Please adopt the strongest rule possible for climate action, racial justice, and public health! Thank you! Maureen Biscardi
- Adrienne Scribner, Erie, CO 80516 Please and thank you!

- Christine Psyk, Hood River, OR 97031 Please be on the right side of history and choose Alternative 3. We have to be bold now to have a future tomorrow.
- Janet Whitmore, Chicago, IL 60660 Please be part of the solution to the climate crisis. We are out of time for excuses and delays that serve only to perpetuate a corrupt corporate system of financial contributions to weak-minded law-makers. It's time to think about our grandchildren and great-grandchildren and leave them a world that is sustainable, equitable and peaceful. Now.
- George Alderson, Catonsville, MD 21228 Please consider this message as our comment on the proposed fuel economy standards. Please close the loopholes that have allowed automakers to keep producing gas-guzzlers. We favor Alternative 3 because it will get the greatest results in energy conservation and reducing tailpipe pollution.
- Susan Costoff, Elkhorn, WI 53121 Please do what is a possibility, to ensure the safety and ability to be healthy, to take the best care of this planet!
- Laurie Roddick, Telluride, CO 81435 Please finalize Alternative 3. We need the strongest and most positive action possible.
- Martha Witwer, Wilmette, IL 60091 Please get polluting cars, and especially diesel trucks and buses off our roads!
- Candace Allison, Atlanta, GA 30329 Please help protect our air for us and future generations!
- Royal Graves, Wethersfield, CT 6109 Please help reduce asthma, and other lung conditions by demanding cleaner more efficient cars and trucks.
- Sarah Freeman, Jamaica Plain, MA 2130 Please help us achieve the cleanest possible air. I live on a busy road (parkway) in Boston, and the cars pass by very close to homes with children, elderly residents, and every age in between. Also pedestrians & bicyclists - park visitors & commuters - are directly exposed to the emissions. We all like to breathe clean air!
- Marie Uffelmann Burns, Staatsburg, NY 12580 Please help us breathe cleaner air! Thanks!
- Savannah Dali, Denton, TX 76210 Please just do this I'm so tired and I hate worrying constantly about my future and the future of the planet.
- Walt Galloway, West Greenwich, RI 2817 Please keep up the progress -- I remember years ago driving through Gary, IN to my grandmother's for Thanksgiving and nearly choking on the air pollution -- no longer that way and let's keep it that way!
- Chris Proctor, New York, NY 10023 Please lead us off The Path of Woe and into The Path of Wisdom. Thank you. Chris Proctor
- Joann Jessee, West Chester, OH 45069 Please make fuel efficient cars and trucks a priority to save our planet. I'm so worried about what kind of world my grandchildren are going to be living in. The greed of the fossil fuel industry is obscene. Our lives depend on clean electric and fuel efficient vehicles. I have driven a Prius since 2008 and love it. I average 45-50 mpg.
- Kevin King, Garrison, NY 10524 please make our world safer and cleaner
- Daisy McCoy, Lyndon Center, VT 5850 Please make the future for our children better.
- Pat Fling, Saint Petersburg, FL 33702 Please make this an urgent goal and action plan.
- Maureen Bawa, Oviedo, FL 32765 Please protect our communities with cleaner more efficient vehicles. The air is getting much worse. I can't open my car window because of the horrible exhaust. It is bad for our health.
- Erin Hayes, Danville, PA 17821 Please protect the planet for the future of my three young children!
- Michael Larkin, Pocatello, ID 83204 Please provide rules that improve vehicle mileage and reduce pollution. Thank You
- Lucia Maxwell, Tallahassee, FL 32309 PLEASE raise standards of pollution for ALL cars.....Americans pay in the end with poor health, and the future of our children on a planet with warming out of control is in question,. TAKE LEADERSHIP with policies that make a real difference for Americans.
- Lura Brookins, Santa Fe, NM 87505 Please regulate for cleaner cars as it is time for corporate America to step up and innovate to protect our climate!
- Martha Martin, Kahului, HI 96732 Please require vehicles to be cleaner and much more efficient.
- Leon Johnson, West Valley City, UT 84119 Please set high standards for automakers to make clean-running cars.
