

## **Comment from jean publieee**

we want 100 miles per gallon and we want it in 2022. we want it now. the car companies can do it. we want smaller cars at cheap rates so that we can buy them to get around. disabled need such vehicles. we are sick of stupidity of listening to what car companies want to provide. we want to go far on one gallon of gas. we can do it. why don't we? also we need hydrogen cars that only run on water. we need to do something and stop allowing thee huge big cars that nobody needs
