

## **Comment from Steven Haws**

Posted by the **National Highway Traffic Safety Administration** on Mar 14, 2022

Please consider legislation that would allow the option for the use of technology to enhance vehicle security it both cars and autocycles/motorcycles. In this day and age where cameras can allow a driver to view blind spots, rear view, side view, and even top view (most of the time without having to turn their heads, and therefore watching the road more thoroughly), why wouldn't we want to encourage that kind of safety?
