

## **Comment from Justin Romero**

Mandatory Speed Limits on Commercial Vehicles with cause major traffic Issues on American Highways far worse than we have now and not to mention even bigger supply chain shortages than we have now. I have been a Commercial Over the road driver for over 20 years. I currently drive a company 53' foot semi that Is governed at 65 mph. I can't pass nobody often pretty much have to slow down Let everyone pass me. With all Trucks traveling at 65mph Just Imagine a Convoy of Trucks all Traveling at the same speed on America's Highways It'll be a disaster. Especially when One driver Is Trying to pass. This Will cause major road rage with regular cars and in my opinion be even more unsafe for the motoring public. Please reconsider passing this into Law. Thanks and have a Great Day!
