

## Consumer Alert Goodyear Issues Recall for Select Tires Used on RVs

June 7, 2022 | Washington, DC

### ***NHTSA Warns Against Aftermarket Sales***

Goodyear is [recalling more than 170,000 tires](#) that were produced between 1996 and 2003 and sold for use on trucks and recreational vehicles. The National Highway Traffic Safety Administration found that these tires experienced a high rate of failure on RVs when compared to similar tires. Tire failure at highway speeds can lead to serious injury or death.

The recall specifically applies to G159 tires size 275/70R22.5, commonly found on RVs. While these tires are no longer being produced, some RV owners may have the tires on their vehicle, or set aside as a spare, and do not know. NHTSA urges anyone who owns, rents, or uses an RV or truck with 22.5-inch rims to ensure these tires are not in use on their vehicle.

Despite being discontinued, it is possible that these tires can be found for purchase on online marketplaces. It is illegal under federal law to sell recalled tires or other motor vehicle equipment.

NHTSA [opened a defect investigation into G159 tires](#) based on claim and complaint data obtained from private litigation alleging that Goodyear G159 tires installed on Class A motor homes failed in service, causing deaths or personal injuries.

Drivers with impacted tires are encouraged to obtain a free replacement from a Goodyear Commercial Tire and Service Network location or authorized Goodyear commercial truck tire dealer immediately. Visit [goodyearrvtires.com](http://goodyearrvtires.com) or [goodyeartrucktires.com](http://goodyeartrucktires.com) to locate the nearest retailer or call [866-353-3847](tel:866-353-3847).

Goodyear is offering \$500 in exchange for impacted tires that have not been fitted on an RV. Please contact Goodyear Consumer Relations at [800-592-3267](tel:800-592-3267) for information on the exchange process.
