

## **Comment from Joseph Gonzalez**

1. The government apparently doesn't understand that there are hills and mountains all that supposed fuel savings will get pissed away when these trucks go down hill.
2. 20% of passenger vehicles drive 15mph above speed limit 30% drive 10mph above speed limit 30% drive 5mph above speed limit 19% drive the speed limit 1% drive under. To limit trucks without limiting passenger vehicles is asking for accidents.
3. Supply constraints much so you want the baby formula to take longer to be delivered. Smh
