

Comment from Melissa McKown

Mandatory Speed Limits on Commercial Vehicles will cause major traffic Issues on American Highways far worse than we have now and even bigger supply chain shortages than we have now. Truck drivers won't be able to pass and will often pretty much have to slow down and let everyone pass them. With all Trucks traveling at 65mph, imagine a Convoy of Trucks all traveling at the same speed on America's Highways, it will be a disaster! One driver will try to pass another truck and this will cause road rage with regular cars and be even more unsafe for the public on the roads. Please reconsider passing this into Law. Truck drivers should be allowed to have control of their vehicles. If this is actually about safety on the roads have more State Troopers giving out speeding tickets.
