Posted by the **National Highway Traffic Safety Administration** on Aug 9, 2022

Hello,

As a member of the disabled community, I find the San Francisco Municipal Transportation Agency vague request for extension or delay disappointing despite as it alledged San Francisco is the location with the most intensive testing of automated vehicles which should mean numerous years of data. I do agree they should have valuable information to offer and be affected by the outcome of the petition but if that being the case why isn't comprehensive information not already available for submission into the record.

I request the National Highway Traffic Safety Administration carefully weigh any relevant data that has a material safety consideration for an extension versus San Francisco Municipal Transportation Agency desire to opine on the issues in this petition despite adequate public notice.

As a private person with disabilities, I recognize the value of this technology if it is proven safe as human driving. I ask that San Francisco Municipal Transportation Agency request for an extension be denied unless a data specific basis can be found for an additional sixty day comment period.

Thanks for your consideration.
