

## **Comment from Cade Duncan**

Posted by the **National Highway Traffic Safety Administration** on Sep 12, 2022

This report is talking about things that could be done to reduce climate change. This is something that can be done in our world very easily if we can all come together and decide that we care about the earth and make a change so that future generations will be able to survive and thrive on Earth. One of the things that I read in the report was about cars and how that is the most common form of transportation and is always a big impact on climate change. If more people cared about this issue an alternative form of transportation could be a big first step to trying to solve the issue of climate change and humans impact on the destruction of Earth.

One of my favorite things about this report was that it gave some options on how we can impact or help our world. It made me realize that even though this is a world problem there are things that I can do individually that can help. One of the things we can all do is share the knowledge that we have learned and spread the word about the things we can do to save our world.
