The climate crisis is real and rapidly getting worse. President Biden has properly warned that it poses an existential threat to humanity. It is imperative that we phase out the burning of fossil fuels as soon as possible. I urge the adoption and enforcement of the strongest possible CAFE standards. Vehicle manufacturers need to fully cooperate because corporate profits are immoral if they are gained at the expense of contributing to increased human misery and death. Health is the ultimate wealth, for us and our biosphere. Thank you very much for your consideration.
