Police officer are those that contribute at most to keep the public road safe from offender and abused use of vehicles.

However they are not provided with any means to verify a offender on the coming automated vehicle or those who intended to be in automated vehicles.

They are stakeholder of keeping our road safe and without way to verify how system interacted with the user, how could they do the job for us and keep the road safe.

If this automated are coming to use, do not wait until accidents to occur but incorporate appropriate equipments and provide tool so that any police could do their job to properly whether a vehicle had been properly used of not, whenever witnessed abuse use.

Nobody will confess they have been drinking but an alcohol checker is master piece to reduce drunk driver on the road, No, time to add illegal sleeping driver on the road as one cannot distinguish a illegally used vehicle from vehicle actually operated under Level 4 automation condition.

Thank for the consideration to keep our today and tomorrow road safe.
