Hello, I am a Political Science student at Belleville West High School. I support this proposed rule making to Establish Light-Duty Vehicle Greenhouse Gas Emission Standards and Corporate Average Fuel Economy Standards. I think that this rule could be very beneficial to our air and the rest of our environment. We know that the gas emitted from cars is very toxic to our atmosphere and is causing some serious problems with our climate and environment. So I think it is very important that we find a way to help save our environment and I think starting with creating more environmental friendly cars would be a good step in the right direction. Thank you for your consideration.
