

Memorandum

U.S. Department of Transportation
National Highway Traffic Safety
Administration

Subject: Vehicle Specification Sheets Relating to the Corporate Average Fuel Economy Standards for Model Years 2024-2026 Passenger Cars and Light Trucks Rulemaking

Date: March 20, 2023

From: Joseph Bayer, Chief
Office of Rulemaking Fuel Economy
Division

To: Docket No. NHTSA-2021-0053

Thru: Jane Doherty, Director
Office of International Policy, Fuel Economy
and Consumer Programs

Docket No. NHTSA-2021-0053 contains a separate docket memorandum reflecting the documentation and files associated with the CAFE Model (also sometimes referred to as the “Volpe model”) used to support the Corporate Average Fuel Economy (CAFE) Standards for Model Years 2024-2026 Passenger Cars and Light Trucks final rulemaking. As that docket memorandum describes, the input, output, source code, and documentation files for the CAFE Model are available on NHTSA’s website.

One of these CAFE modeling files that was made available on NHTSA’s website is the Market Data File, which “contains the detailed description of the vehicle models and model configurations each manufacturer produces for sale in the U.S.” 87 Fed. Reg. 25710, 25755 (May 2, 2022). As the preambles to both the Final Rule and Notice of Proposed Rulemaking explain, vehicle information listed in the Market Data File is based, in part, on publicly available “specification sheets, usually from the manufacturer media website, or from online marketing brochures.” *Id.* at 25756; *accord.* Notice of Proposed Rulemaking, Corporate Average Fuel Economy Standards for Model Years 2024-2026 Passenger Cars and Light Trucks, 86 Fed. Reg. 49602, 49633 (Sept. 3, 2021). The table below is a catalogue of these materials, which are all in the public domain. These materials can also be made available, to the extent permitted by copyright law, upon request. The relevant vehicle information gathered from these materials is also set forth in the Market Data File on NHTSA’s website.
