<b>1. Report No.</b> DOT HS XXX XXX	<b>2. Government Accession No.</b>	<b>3. Recipient's Catalog No.</b>
<b>4. Title and Subtitle</b> COST, WEIGHT, AND ANALYSIS OF PEDIATRIC VEHICULAR HEAT STROKE		<b>5. Report Date</b> 27 March 2023
		<b>6. Performing Organization Code</b>
<b>7. Author</b> Ricardo Inc.		<b>8. Performing Organization Report No.</b>
<b>9. Performing Organization Name and Address</b> <b>Detroit Technical Center</b> <b>Van Buren Twp., MI</b> <b>48111 USA</b>		<b>10. Work Unit No. (TRAIS)</b>
		<b>11. Contract or Grant No.</b> 693JJ922D000006/ 693JJ922F00092N
<b>12. Sponsoring Agency Name and Address</b> National Highway Traffic Safety Administration Evaluation Division; National Center for Statistics and Analysis 1200 New Jersey Avenue SE. Washington, DC 20590		<b>13. Type of Report and Period Covered</b> NHTSA Technical Report
		<b>14. Sponsoring Agency Code</b> NSA-310
<b>15. Supplementary Notes</b>		
<p><b>16. Abstract</b></p> <p>Systems that can prevent pediatric vehicular heat stroke are intended as an aid in reducing approximately 38 deaths that occur annually in the US from infants being left unattended in a hot vehicle [1]. Technology was found and categorized into 3 classes:</p> <ul style="list-style-type: none"> <li>• OEM vehicle systems</li> <li>• Pediatric car seat systems</li> <li>• Aftermarket systems.</li> </ul> <p>OEM vehicle systems were found with 3 sub-classes of technology:</p> <ul style="list-style-type: none"> <li>• Rear seat reminder, exemplified in the GMC Acadia</li> <li>• Ultrasonic sensor rear occupant alert, exemplified in the Hyundai Palisade</li> <li>• Radar sensor rear occupant alert, exemplified in the Genesis GV70 Pediatric car seat systems were found with examples of two technologies: <ul style="list-style-type: none"> <li>• Evenflo car seats using the SensorSafe chest clip</li> <li>• BeSafe car seats using a smart buckle sensor</li> </ul> </li> </ul> <p>Aftermarket monitoring systems were available covering a range of technical capabilities. The 5 systems investigated herein included:</p> <ul style="list-style-type: none"> <li>• Elepho eClip – a smartphone connected belt clip</li> <li>• Babi Smart Cushion – a smartphone connected pressure sensor</li> <li>• Steel Mate – a weight sensitive pad for baby seats and a driver's seat belt sensor connected to an in-vehicle alert</li> <li>• Feisike – a pediatric video camera to allow for monitoring infants in the rear seat on a dash-mounted</li> </ul>		

display. No alerting function included.

- Snookums – a physical mirror to allow for observing rear facing infants in the rear seat through the driver’s rear-view mirror. No alerting function included.

The end-user cost increase was determined from the total manufacturing cost for the OEM vehicle system components and the car seat system components. Retail price was taken as the end-user cost for the aftermarket systems. End-user costs for each system are shown in the table below.

<i><b>OEM Vehicle Systems</b></i>	<b>End-user cost increase</b>	<i><b>Pediatric Car Seat Systems</b></i>	<b>End-user cost increase</b>	<i><b>Aftermarket Monitoring Systems</b></i>	<b>Retail price</b>
GMC Acadia Rear seat reminder	\$0.00	Evenflo - SensorSafe chest clip	\$20.19	Elepho eClip belt clip	\$49.96
Hyundai Palisade Ultrasonic rear occupant alert	\$20.33	BeSafe - smart buckle sensor	\$38.59	Babi Smart Cushion	\$59.99
Genesis GV70 Radar rear occupant alert	\$19.49			Steel Mate baby seat alarm	\$34.99
				Feisike video camera	\$33.99
				Snookums fixed mirror	\$27.99
