USA

Description

The objective is to improve the effectiveness of NCSA's data analytical products and tools and expedite data analysis processes to share insights gained from the data in a timely manner.

This includes utilizing advanced statistical and cutting-edge data science techniques, such as ML, NLP, and other AI, to enhance current and additional data elements, data analysis, and to create user-friendly applications, data analysis tools, and dashboards for faster access to insights and trends. Additionally, this also entails exploring the use of analytical techniques to identify emerging crash trends, integrate supplementary data sources, develop monitoring programs for special studies, improve current projections and forecasts, and provide analytical training materials and documentation for users.
