This goes too far and impacted citizens privacy and safety. There should be no ability to monitor the occupants in their own property/vehicle. If the goal is to reduce drunk driving accidents, then it should be limited to only a breathalyzer and when the vehicle is being started. The ability to stop a vehicle while in motion is far more dangerous and given detection technology has a LOT of false positives; it is not a justifiable risk to take that also infringes of privacy of citizens. This is a huge over reach of government and violation of civil liberties and privacy.
