

Mitigation Measures

Because BFN would continue operating within all applicable federal, state, and local regulations, and because no new construction or modifications to the facility is anticipated or planned during the proposed subsequent period of extended operations, no new mitigation measures would be required beyond those already implemented as a result of initial construction and operations. Should any construction or modification be anticipated or planned, TVA would follow all appropriate permitting requirements and environmental reviews would be pursued prior to deciding to pursue those projects. Best Management Practices would be implemented including those described in A Guide for Environmental Protection and Best Management Practices for Tennessee Valley Authority (TVA 2017b), stormwater pollution and Spill Prevention, Control, and Countermeasure (SPCC) plan, and other permit conditions

- BFN also has an Integrated Pollution Prevention Plan that addresses storage, secondary containment, and inspections of fuel, hazardous materials, and chemicals like biocides. Attachment 5 of the plan provides an inventory of all tanks, pumps, transformers, and other containers where these materials are used or stored, including the type of secondary containment for each. The secondary containment limits the potential for minor chemical spills to occur outside of containment areas.

- The discharge of chemicals to surface water would be regulated by the conditions set forth in the NPDES permit.

- Dredged material would be disposed of on land lying and being outside the 500-year floodplain in an onsite spoils area and above the 500-year flood elevation.

- Water-use and water-dependent structures and facilities would be located within 100-year floodplains, and flood-damageable equipment and facilities would be located at a minimum outside 100-year floodplains, and Critical Actions would be located at a minimum outside 500-year floodplains.

- All handling and disposal of non-radioactive and radioactive wastes would be in accordance with applicable rules, regulations and requirements of local, state, and federal laws.

Timothy Rausch,

Executive Vice President and Chief Nuclear Officer, Tennessee Valley Authority.

Federal Aviation Administration

[Docket No. FAA-2024-0086]

Agency Information Collection Activities: Requests for Comments; Clearance of a Renewed Approval of Information Collection: Part 121 Operating Requirements: Domestic, Flag, and Supplemental Operations

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice and request for comments.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, FAA invites public comments about our intention to request the Office of Management and Budget (OMB) approval to renew an information collection. The collection involves regulations that prescribe the requirements governing air carrier operations. The information collected is necessary to determine air operators' compliance with the minimum safety standards and the applicants' eligibility for air operations certification.

DATES: Written comments should be submitted by March 18, 2024.

ADDRESSES: Please send written comments:

By Electronic Docket:

www.regulations.gov (Enter docket number into search field).

By mail: Sandra Ray, Federal Aviation Administration, AFS-260, 1187 Thorn Run Road, Suite 200, Coraopolis, PA 15108.

By fax: 412-239-3063.

FOR FURTHER INFORMATION CONTACT:

Sandra L. Ray by email at: Sandra.ray@faa.gov; phone: 412-546-7344

SUPPLEMENTARY INFORMATION:

Public Comments Invited: You are asked to comment on any aspect of this information collection, including (a) Whether the proposed collection of information is necessary for FAA's performance; (b) the accuracy of the estimated burden; (c) ways for FAA to enhance the quality, utility and clarity of the information collection; and (d) ways that the burden could be minimized without reducing the quality of the collected information. The agency will summarize and/or include your comments in the request for OMB's clearance of this information collection.

OMB Control Number: 2120-0008.

Title: Part 121 Operating Requirements: Domestic, Flag, and Supplemental Operations.

Form Numbers: None.

Type of Review: Renewal of an information collection.

Background: Under the authority of Title 49 CFR, Section 44701, Title 14 CFR prescribes the terms, conditions, and limitations as are necessary to ensure safety in air transportation. Title 14 CFR part 121 prescribes the requirements governing air carrier operations. The information collected is used to determine air operators' compliance with the minimum safety standards and the applicants' eligibility for air operations certification. Each operator which seeks to obtain or is in possession of an air carrier operating certificate, must comply with the requirements of part 121 which include maintaining data which is used to determine if the air carrier is operating in accordance with minimum safety standards.

Respondents: 90 Part 121 Air Carriers.
Frequency: Information is collected on occasion.

Estimated Average Burden per Response: Varies per response and requirement type.

Estimated Total Annual Burden: 1,472,143 hours.

Issued in Washington, DC, on January 11, 2024.

Sandra L. Ray,

Aviation Safety Inspector, AFS-260.
