Manufacturer Name :	Prevost Car (US) Inc.
Submission Date :	DEC 22, 2023
NHTSA Recall No. :	23V-889
Manufacturer Recall No. :	SR24-03

Manufacturer Information :

Manufacturer Name : Prevost Car (US) Inc. Address : 201 South Avenue South Plainsfield NJ 07080 Company phone : 908-222-7211

Population :

Number of potentially involved : 2,097 Estimated percentage with defect : 100 %

Vehicle Information :

Descriptive Information :	The population was determined based on the production period and the information provided by the supplier (Ricon - see NHTSA Recall 23E091). The subject vehicles are certain MY2014 and MY2018 Prevost H3-41 vehicles manufactured during the indicated production dates. The recalled products are limited to these specific vehicles since they were the only ones equipped with a wheelchair lift "Threshold Warning System" recalled by Ricon. A total of 2 MY2014 and 2 MY2018 Prevost H3-41 vehicles are affected by the recall.

San Fernando California 91340Country :United States

Chronology :

2023-11-21 Ricon informed Prevost that a non-compliance with FMVSS 403 has been discovered in certain "Threshold Warning System" kits sold to Prevost.

2023-12-05 Internal Prevost investigation was opened to determine if the issue is potentially safety related or a non-compliance. Prevost considered the information included in Ricon's Recall 23E091 when evaluating the existence of a potential non-compliance.

2023-12-06 Preliminary internal testing was performed with a beacon integrated in a Prevost vehicle. The minimum light intensity of 20 candela specified in FMVSS 403 was not achieved during this preliminary internal testing.

2023-12-14 Case was presented on Volvo Product Safety Evaluation Committee (PSEC) to evaluate if there is a potential non-compliance issue. Decision made to raise the potential non-compliance issue to Volvo Product Safety Committee (PSC) for review and determination.

2023-12-19 Case was presented to Volvo Product Safety Committee (PSC). It was concluded that there was a non-compliance and that a recall is needed.

2023-12-19 Delivery stop was issued to stop the delivery of vehicles until corrective actions are implemented in production.

2023-12-21 Internal campaign was launched to solve the issue on all vehicles in production before being delivered.

2023-12-22 Defect Information Report submitted to authorities.

The information contained in this report was submitted pursuant to 49 CFR §573

No warranty claims related to this issue. No field reports, incidents, accidents, injury, or fatality were reported.

Description of Remedy :

Description of Remedy Program :	Prevost will replace the red beacon included in the "Threshold Warning System" on all potentially affected vehicles as per the supplier's instructions. Letters will be sent to customers to inform them on how to proceed. Prevost will execute this correction free of charge (parts and labor) for the customers. In case a customer has already inspected and corrected this defect before the safety recall has been launched, this customer will be reimbursed according to Prevost reimbursement plan.
	The issue concerns a component that does not comply with FMVSS 403, and not a defective component. After the remedy, the beacon supplied and installed per Ricon's instructions will comply with the requirements of FMVSS 403.
	The recall condition was corrected in production on December 21, 2023, when an internal campaign was launched. All vehicles are corrected prior to delivery.

Recall Schedule :

Description of Recall Schedule :	Please note that Prevost does not have a dealer network and the dates
*	entered for the planned dealer notification begin/end date are only to
	avoid NHTSA Recall Portal error while submitting the recall report.
Planned Dealer Notification Date :	FEB 09, 2024 - FEB 09, 2024
Planned Owner Notification Date :	FEB 09, 2024 - FEB 09, 2024

* NR - Not Reported
