

Part 573 Safety Recall Report

24V-617

Manufacturer Name : Winnebago Towable

Submission Date : AUG 16, 2024

NHTSA Recall No. : 24V-617

Manufacturer Recall No. : CAM0000037

Manufacturer Information :

Manufacturer Name : Winnebago Towable

Address : 201 14th Street

Middlebury IN 46540

Company phone : 825-5250

Population :

Number of potentially involved : 210

Estimated percentage with defect : 100 %

Vehicle Information :

Vehicle 1 : 2024-2025 Winnebago Minnie

Vehicle Type :

Body Style :

Power Train : NR

Descriptive Information : The recall population was determined by identifying the production start in the new plant.

Production Dates : FEB 06, 2024 - JUL 18, 2024

VIN Range 1 : Begin :

NR

End : NR

Not sequential

Description of Defect :

Description of the Defect : On certain 2024 & 2025 Minnie models the microwave circuit is improperly connected to a 20amp circuit breaker instead of a 15amp circuit breaker.

FMVSS 1 : NR

FMVSS 2 : NR

Description of the Safety Risk : This configuration could potentially allow for the wire to become overloaded as the 20amp breaker would not provide adequate protection to the wiring, which increases the risk of a fire.

Description of the Cause : When Minnie models moved to a new production plant a wire change was made which led to units inadvertently built that did not meet print specifications.

Identification of Any Warning that can Occur : NR

Involved Components :

Component Name 1 : Breaker 20Amp

Component Description : 20Amp Breaker

Component Part Number : 1014-1002

Supplier Identification :

Component Manufacturer

Name : NR

Address : NR

NR

Country : NR

Chronology :

In July 2024, an audit was performed in Plant 3 where it was found that the Minnie microwave circuit was inadequately fused (14-2 wire with 20Amp circuit breaker). An investigation was opened, and containment was put in place.

During the investigation it was determined that the wire size was changed when Minnie models moved production from Plant 6 to Plant 3. On August 9, 2024 the Product Safety Committee met to review the investigation and decided the issue presented an unreasonable risk to motor vehicle safety. Winnebago is not aware of any complaints or incidents associated with this issue.

Description of Remedy :

Description of Remedy Program : Reimbursement requests will follow the general reimbursement plan on file with NHTSA.

How Remedy Component Differs from Recalled Component : Winnebago will provide a 15amp breaker to replace the 20amp breaker.

Identify How/When Recall Condition was Corrected in Production : The condition was inspected and corrected in production immediately on the affected model series.

Recall Schedule :

Description of Recall Schedule : Recall schedule will follow the 60 day requirement.

Planned Dealer Notification Date : AUG 30, 2024 - AUG 30, 2024

Planned Owner Notification Date : OCT 11, 2024 - OCT 11, 2024

* NR - Not Reported
