### Chronology :

On or about October 2, 2024, as a result of an internal audit and outside counsel, VanCraft was made aware of a potential safety issue related to the hardware components used in the bench seating system found in the rear of VanCraft's campervans. On November 2, 2024 VanCraft performed a seating pull test under the guidance of 571.207.S4.2.a and 571.210.S4.2.1.a. On November 4, 2024, upon reviewing the results with outside counsel. VanCraft determined that the results present an unreasonable risk to motor vehicle safety and a recall was initiated. Around this same time, VanCraft was also made aware of a potential issue with the hardware used to attach the seat belts to the bench seat belt tabs.

As of November 8, 2024, VanCraft is not aware of any customer complaints, warranty claims, injuries, or property damage as a result of this issue.

Description of Remedy :

Description of Remedy Program :	The remedy to correct this recall condition is under development. Reimbursement requests will follow the general reimbursement plan on file with NHTSA.
How Remedy Component Differs from Recalled Component :	The remedy components will be reinforced and comply with Federal Motor Vehicle Safety Standards.
Identify How/When Recall Condition was Corrected in Production :	All future models will receive the correct seat belt hardware and reinforced seating and mounting systems.
